

Microsurgical Vasectomy: Reversing A Vasectomy Affordably For Patients

June 26, 2023

New Braunfels, TX - June 26, 2023 - PRESSADVANTAGE -

New Braunfels, TX based Microsurgical Vasectomy Reversals by Dr. Mark Hickman is providing vasectomy reversal services for the residents of the local community and more. Dr. Mark Hickman is a highly skilled microsurgical surgeon who focuses his entire practice on the successful reversal of vasectomies and has helped thousands of men become fathers over his storied career of 26 years.

While vasectomies can be a useful medical procedure, it is not always the right option for the men who undergo it. However, despite being advertised as a permanent birth control method, vasectomies are thankfully reversible, and vasectomy reversal is a procedure that has had a positive impact on numerous men. Not only is it suitable for male patients seeking to grow their family, it can also be used to combat the onset of male depression following the original procedure. Patients have seen a return to their more virile days and a lifting of the "male fog" that many experience following a vasectomy.

At Microsurgical Vasectomy Reversals, Dr. Hickman offers two all-inclusive affordable options, making

vasectomy reversals accessible to more people and removing concerns about the cost to reverse a vasectomy from the minds of affected patients. The microsurgical vasectomy reversal cost option of \$3,300 includes local anesthesia and an oral sedative. The \$4,200 offer is performed under IV sedation and is administered by a Board Certified Anesthesiologist. Both microsurgical options are all-inclusive with no hidden fees.

During the procedure, Dr. Hickman performs a microsurgical repair of the vas deferens with a powerful operating microscope and fine nylon suture (much finer than a human hair). A typical repair requires 10-15 stitches. The goal is to create direct and careful alignment of the lumen of the two ends of the vas and a watertight closure for a higher success rate. With nearly 30 years of experience reversing vasectomies under his belt and over 1,300 vasectomy reversals, Dr. Hickman has established himself as a leading minimally invasive surgeon. Dr. Hickman has "corrected" many vasectomy reversals from other providers as well with great success. Learn more here: [Reversing Vasectomy](#).

Dr. Hickman says, "Though getting a vasectomy can be the right move for a lot of people, there is a significant number of patients who wish to reverse the procedure. Some men wish to regain their fertility, some wish to fight the onset of depression, and others yet wish to right a religious wrong that sterilization may represent in some faiths. No matter what the reason is for someone wanting to reverse their vasectomy, at Microsurgical Vasectomy Reversals, our goal is to ensure that all of our patients get a straightforward, simple, and affordable service that reverses their vasectomy and hands them back control over their lives."

Dr. Mark Hickman, MD, FACS, is an expert in laparoscopic procedures who has also invented several surgical instruments and has been awarded a US patent and recognized as a contributor to several other important minimally invasive patents. He began his private practice in New Braunfels, TX in 1988 and soon after became an early pioneer of laparoscopic (minimally invasive telescopic) surgery. He also had the honor of serving his country in Operation Desert Storm aboard the hospital ship USNS Mercy.

Dr. Hickman's dedication, high success rate, and bedside manner have earned him great praise from hundreds of clients who have found happier lives following their vasectomy reversal. Rickey Wright writes in his review, "It's only been six days, but my procedure went great. Doctor Hickman and Pat made me and my wife feel at ease during our consultation before the procedure. I could talk to Doctor Hickman for hours due to his very down to earth personality and how he presents himself as a physician and a person. Thank you, again, and we hope to be updating you in the near future with a baby on the way."

Those who are interested in getting a vasectomy reversal or are interested in learning more about Dr. Mark Hickman, his services, or the general cost of vasectomy reversal should visit the clinic's website. Dr. Mark

Hickman encourages interested parties to get in touch with him directly via email or phone for any additional questions or worries about the procedure.
