

Sunflower Spa Introduces Innovative Semaglutide Medication for Weight Loss

June 22, 2023

June 22, 2023 - PRESSADVANTAGE -

Longmont, CO ? Sunflower Spa has announced that they have recently brought on Semaglutide medication to their menu of services. Semaglutide, originally developed to treat diabetes, is an innovative once-a-week injection that can be used to help patients lose weight in a controlled, medical setting. The popularity of the treatment has recently skyrocketed, and the addition will help Sunflower Spa stay ahead of the curve as they incorporate it into their medical weight loss program. The medication will help patients who are looking for effective, sustainable weight loss methods succeed at their goals, while bypassing the side effects of other weight loss medications.

?At Sunflower Spa, we have a reputation for bringing our patients the best of the best,? said spa owner Patrice vonMetzger. ?We?re always keeping up with the latest and greatest in the industry, from wellness to aesthetics, which makes Semaglutide a perfect fit for us. Weight loss is extremely complicated, more than it ever was before. We?ve been seeing that diet and exercise sometimes aren?t enough to see results due to all these environmental factors and metabolic complications, and Semaglutide is safely bridging that gap for patients.?

Unlike previous weight loss medications, Semaglutide is not an appetite suppressant. Commonly known as Ozempic, Semaglutide works by mimicking a naturally created hormone within the body to produce feelings of fullness, limiting appetite, while also moving food along the digestive tract at a faster rate. In patients with a higher BMI, it causes the body to use stored fat for energy. Noted for how easily it makes portion control an effortless endeavor, Semaglutide does not require a unique diet or other steps to be effective.

?By treating weight loss as a metabolic issue rather than a judgement test of willpower, we?re enabling patients to lead happier, healthier lives without the shame and pressure that weight loss programs can often entail,? continued vonMetzger. ?It?s safe for longtime use, and patients will be completely supported throughout their journey with us. Sunflower Spa promises Longmont residents a higher standard of care and service, and that?s how we?re integrating Semaglutide into our weight loss program. You can come to us and expect world-class care that really supports you, and we have the capabilities to run our medical weight

loss program to those rigorous standards.?

Semaglutide patients can lose up to 15 to 20% of their bodyweight while taking the drug, which is considered to be one of the most effective weight loss medications today. Patients come in once a week for the injection, and the spa's experts will track various health markers throughout the duration of treatment to ensure that it remains effective.

"We want our patients to live well," added vonMetzger. "Semaglutide is a safe means to an end when it comes to weight loss, and the benefits are unparalleled. I can't wait for the first batch of patients to see the possibilities. It's truly incredible!"

Sunflower Spa is open and accepting appointments for new and existing patients.

About Sunflower Spa

Sunflower Spa Injectables and Medical Aesthetics has been Longmont's premier aesthetics spa since 2005. Offering treatments and services at the intersection of science, technology, and medicine, Sunflower Spa offers cutting edge skin care to Longmont residents with a focus on rejuvenation and wellness, featuring treatments like relaxing massages, cosmetic injectables such as botox, medical weight loss, and skin-reviving services like Hydrafacial® among others.
