

All-Inclusive Vasectomy Reversal Available At Texas Specialist

June 30, 2023

New Braunfels, TX - June 30, 2023 - PRESSADVANTAGE -

New Braunfels, TX based Microsurgical Vasectomy Reversals, led by Dr. Mark Hickman, is offering patients an affordable way to reverse a vasectomy. Dr. Hickman and his team have been helping men recover the ability to father children as well as their sense of self for years, and they are proud to make this procedure more accessible for families across the region.

Many consider vasectomies to be a permanent, irreversible procedure that can take away a man's ability to father children. However, patients should be aware that a vasectomy does not always guarantee that a pregnancy cannot occur ? and those who change their mind about having children in the future will be delighted to learn that it is reversible. The procedure is sensitive and requires a practiced hand, but that is fortunately what Microsurgical Vasectomy Reversals offers.

Those who have explored the cost of a vasectomy at other clinics may have been dismayed to find out just how exorbitantly costly it can be. Recognizing how devastating this can be to families who want more

children, Dr. Hickman decided to focus his career and clinic on vasectomy reversals, and this allowed them a great deal more flexibility with pricing.

Today, the clinic is proud to offer two all-inclusive options. The microsurgical vasectomy reversal cost option of \$3,300 includes local anesthesia and an oral sedative. The other option, at \$4,200, is performed under IV sedation (administered by a Board Certified Anesthesiologist). Patients are encouraged to speak to Dr. Hickman regarding the differences between these options if they have any concerns. See more: [Vasectomy Reversal Surgeons](#).

Whichever they pick, however, they can rest assured that the cost will not change after the fact. During a procedure, Dr. Hickman may come across certain complications that are unique to each patient (such as blockages or other issues). Whatever the case may be, he will attempt to rectify the issue in order to ensure a successful vasectomy reversal. There will be no extra charge if such an addition is required during an otherwise typical procedure, which means both microsurgical options are all-inclusive with no hidden fees.

There are several reasons why a patient would want to reverse a vasectomy. Many, for instance, go through the procedure when they are relatively young and perhaps believe that they will never want children. As time goes on, they may change their minds, and given the erroneous belief that vasectomies are permanent procedures, the presumed inability to father children may even lead to depression and other unwanted outcomes.

The clinic comments that many patients also get in touch because they already had children and believed they did not want more. Again, having changed their minds later on, the only practical option left is to get it reversed. Whatever a patient's reasons may be, they are welcome at Dr. Hickman's practice. This welcoming environment also serves to enhance the patient's comfort and overall experience.

David S. shares, "The personal level of care and service received for my reversal was special and outstanding. We flew in from out of town, everything was quick and efficient yet personal and caring. Both the Dr. and his right hand Pat were excellent communicators. We didn't choose this option because of the excellent pricing (which was a plus) but based on the reviews we read and his focus and specialty is doing reversals. We were pleasantly surprised when Dr. Hickman said a special prayer over me right before the surgery started. My vasectomy was around 13 years ago. My wife and I decided we wanted more children, hoping and praying that we will be able to get pregnant soon."

Dr. Hickman and his team are always pleased to hear back from families when they successfully get pregnant. To date, they have helped numerous families grow in this way, and they look forward to doing the same for years to come.

Those who wish to learn more about the price of a vasectomy reversal at Microsurgical Vasectomy Reversals by Dr. Mark Hickman are welcome to visit the clinic's website or get in touch over the phone (or email). Patients who would be visiting from out of town are encouraged to inquire about the clinic's special accommodations as well.
