

Residential & Commercial Insulation Services Provider Launches in Southwest Kansas City

July 10, 2023

July 10, 2023 - PRESSADVANTAGE -

iFoam of Southwest Kansas City, a company based in Gardner, KS, has launched their commercial and residential insulation services for the Southwest Kansas City area in the state of Kansas. Among the insulation services they provide is the installation of spray foam insulation, which offers the benefit of higher energy efficiency of up to 30 percent as a result of the ability of this type of insulation to prevent air infiltration. They can also provide blown in insulation, which is made up of bits of insulation that are blown to the space in the home that requires insulation. Those who would like to get more information about the company and its services can visit company website.

A spokesperson for iFoam of Southwest Kansas City says, "We offer a variety of services, including residential retrofit, insulation removal, air sealing, and blown in attic insulation. Our process is simple and efficient, and we always put the needs of our Southwest Kansas City Kansas clients first. We understand that everyone's insulation needs are different, which is why we offer a variety of spray foam insulation installation services, including attic insulation, crawl space insulation, new construction, and more. We also understand that not everyone is familiar with spray foam insulation. Because of this, we take the time to explain all your options so you can make an informed decision about which service or product will work best for you."

For homeowners who want to reduce their electric bill by enhancing the insulation of their home, iFoam of Southwest Kansas City can offer a residential retrofit. They can enhance the home's insulation by installing either blown in insulation or spray foam insulation.

For homes or commercial buildings with damaged or old insulation, they can provide insulation removal. Next, they can install spray foam insulation, which is installed by spraying the insulation in liquid form to the area where insulation is needed, such as in between walls and in the attic. The company's team of insulation professionals are capable of providing the best quality spray foam insulation services. They have years of experience in installing insulation for residential, commercial, and industrial buildings.

Spray foam is a type of insulation that originally in liquid form and this is sprayed to the area where the insulation is to be installed. The liquid expands and turns into foam, which ensures a tight seal, which can prevent heat transfer and entry of air from the outside. iFoam of Southwest Kansas City can therefore help the home or building have a better energy efficiency, which results into lower energy costs.

Meanwhile, blown-in insulation is installed using an advanced blower technology that applies the insulation materials to the target area while providing consistent thickness throughout.

The materials that may be used in blown-in insulation are fiberglass, cellulose, and mineral wool. Fiberglass, which is manufactured from 40 to 60 percent of recycled glass, is the most common insulation material currently being used. Mineral wool, which is made from slag or rock recycled from industrial operations, has been declining in popularity. Cellulose is typically made from recycled newsprint it has the disadvantage of being dusty during installation.

iFoam of Southwest Kansas City is owned by Scott Lemon and Jake Henning, who believe in their community and are excited to offer insulation services to enhance the quality of life of community members. Their service area includes: Gardner, Edgerton, Fairway, Leawood, Lenexa, Louisburg, Merriam, Mission Hills, Mission, Olathe, Overland Park, Roeland Park, and Shawnee, all in Kansas.

Satisfied customers have already left some five star reviews. For instance, J. Lynch has given them a five star rating and said, "Can't say enough about the company and staff at iFoam. I was hesitant about spray foam insulation at first but they educated me, quoted me an affordable price, and completed the job in a timely manner. My power bill has dropped significantly."

Those who would like to know more about the insulation services provided in Southwest Kansas City and neighboring areas can visit web site of iFoam of Southwest Kansas City or contact them through the

telephone.
