

The Expert Orthodontist Dublin Dentist Announces Their High-Tech Dental Care And Brace Services

December 10, 2015

December 10, 2015 - PRESSADVANTAGE -

Working regularly for providing the top class dental care services to their patients, the Orthodontist Dublin Dentist has announced their dental care services comprising latest brace technology and modern dental care techniques for better than ever results.

Dental issues are inevitable and people wish to avail the best services possible to resolve their dental problems and get their beautiful smiles back. Providing such expert services in the most professional and high-tech manner, 'Orthodontist Dublin Dentist' has been using latest technologies and medical solutions for providing the top-notch dental services to the people of Dublin. The expert dental care service providers have announced the modern and innovative dental care services for their patients as a continuation of their efforts of making the best dental care techniques available to their patients.

Dr. Kevin Kavanagh, who is also the CEO of Orthodontist Dublin Dentist, said that the idea is to bring the latest and most effective dental care services within everyone's reach to provide them the most satisfying results. 'We meet patients who feel uncomfortable with their smiles and together we try to create a plan that enables our patients to have the smile that they have always wanted,' said Kevin.

Talking about the new and advanced dental care techniques that they have introduced and have been using successfully, Kevin said that they are certified Invisalign provider and provide their patients with perfectly straight teeth in just nine to fifteen months. 'Invisalign is the latest brace type which is not visible easily and can be removed whenever desired,' told Kevin.

Adding on to the list of innovative dental care techniques, he said that their dental care facility is proud to provide their patients with the highly advanced 'KÖR' deep bleaching, a latest technique to provide sparkling white teeth. He also said that their facility utilizes digital X-rays and thus their patients don't have to wait for the results as they can directly be seen on their computer screens. Their complete dental care services include root canals, dentures, oral surgery, braces, implants, periodontics, endodontics and much more.

Receiving warm reviews and feedback from their clients, Kevin credits this to his team of experts who are highly skilled and work relentlessly to give the best experience and results to their patients. As told, in addition to being a highly experienced dental expert, Kevin also gives lectures to dental students and dentists nationwide on cosmetic and advanced dentistry. Under his able leadership, the Orthodontist Dublin Dentist team works hard to provide complete dental care in the most advanced manner to their patients.
