

## **Property Mitigation Services Provider in Chula Vista California Has a Five-Star Reputation**

*July 17, 2023*

July 17, 2023 - PRESSADVANTAGE -

DryFix Restoration Inc, a company based in Chula Vista, CA, that provides property mitigation services takes pride in its five-star reputation. They currently have an overall rating of 5.0 out of 5 stars on Google. The company provides water damage mitigation services, mold inspection and remediation services, and fire and smoke damage restoration services in the San Diego and Temecula areas, including Spring Valley, La Mesa, Santee, El Cajon, Lemon Grove, Bonita, Del Mar, National City, Imperial Beach, and Solana Beach Counties.

In a recent review, Kendra gave DryFix a five star rating and said, "We remodeled the whole master bathroom and walk-in closets after a fire had destroyed most of the walls and ceilings. The fire damage restoration team was incredibly helpful in helping us through the process from start to finish. They explained what needed to be done to help make sure everything was up to code. Thank you."

A spokesperson for DryFix says, "We're really proud of the five-star reviews we have been receiving but it was to be expected as a result of our commitment to providing the best possible service we can provide for

every restoration project we undertake. Our team is well-equipped to repair and rebuild any structure on your property that is damaged. As a one-stop source for loss mitigation and reconstruction services, you can rest assured that our top priority is always to first determine the ways in which we might be able to save as much of your property's structure and contents as possible.?

They can also provide insurance claims estimations and consulting. Their experts can offer clients a detailed, line item, insurance claim estimate that includes a thorough and comprehensive inspection of the property, sketches, and photos of the damage, and the scope of the claim damages.

They make sure to provide water damage mitigation services as quickly as possible because the longer the home or building and its contents are soaked in water, the more the water has infiltrated deeper into the wood, concrete, plaster, and other items. They will utilize commercial-grade tools to pump the water out and then use high-powered blowers and dehumidifiers to dry out all of the structures that are wet. They will get rid of the furniture, flooring, and drywall that can't be dried and saved. They will clean and disinfect all of the items that can be salvaged. They will also check on the structural stability of the home or commercial building. They will board up or cover with tarpaulin those parts of the home that are exposed to the elements. Lastly, they will check on the humidity of every room to ensure it is at the proper level.

After a fire, when the firefighters had finally extinguished the fire, the homeowner or property owner may need the fire damage restoration services offered by DryFix. First of all, the water used to put out the fire has accumulated inside the home or building. The water has to be removed, after which the soot also needs to be cleaned. Next, they will restore the damaged parts of the home. Their fire remediation services include: wall, floor, and ceiling repair; carpet cleaning or replacement; smoke damage repair; upholstery cleaning; and damage repair.

The mold removal services they provide is also important because mold spores inside the home can be a huge health concern as exposure to mold has been associated with disease in humans, animals, and plants. Exposure to mold has been linked to cough, sore throat, nasal and sinus congestion, nosebleed, headaches, asthma, and skin and eye irritation.

Founded in 2020, DryFix Restoration Inc is composed of a team of property damage restoration professionals and contractors ready to provide any repair or restoration job quickly, correctly, and safely for owners of residential and commercial properties, real estate professionals, and facility and property managers. They provide mold inspection and mold remediation services, fire and smoke damage restoration services, and water damage mitigation services in Chula Vista and the neighboring areas.

Those who are interested in the property mitigation services they provide can check out the DryFix Restoration Inc website or contact them on the phone or through email.
