

Clearwater Exteriors, a Replacement Windows Service Provider, Earns Another Five Star Review

July 27, 2023

July 27, 2023 -

Clearwater Exteriors, a company based in Denver, CO, offering replacement windows service, is proud to announce they have earned another five star review from a satisfied customer. When searching for the best provider of replacement windows Denver residents can depend on Clearwater Exteriors, which is committed to providing quality products and services at reasonable prices. At the present time, they continue that commitment with their advanced and highly energy efficient double-pane windows.

In the above-mentioned five star review, Shelli B. said, ?I made the correct choice with Clearwater! I love my new windows! Everything about them is great! And the crew that put them in were the most awesome group of gentlemen, perfectionist to say the least. I'm so happy with these windows! Have received compliments from neighbors and family! Thanks Clearwater.?

Laurence Meadows, President of Clearwater Exteriors, says, ?As a replacement window company we stake our business on selling the best windows in the industry. Our replacement windows are made in the United

States and specifically designed to stand up to Colorado?s weather extremes. They are constructed to assure lasting quality, performance, and energy efficiency. With double-pane glass and an airtight insulating chamber they offer enhanced thermal performance and durability.?

The windows provided by Clearwater Exteriors have been rated by Energy Star as ?Most Energy Efficient 2021,? ?Most Energy Efficient 2022,? and ?Most Energy Efficient 2023.? The windows are independently tested, verified, and certified by the National Fenestration Rating Council (NFRC). The NFRC ratings ensure the windows comply with the strict energy efficiency guidelines established by the US Environmental Protection Agency (EPA).

There are several advantages of using the energy-efficient replacement windows offered by Clearwater Exteriors. These include the ability to: prevent heat from escaping during winter and keep the heat out during the summer; ensure the home is more comfortable throughout the year; reduce energy bills; and decrease energy consumption that in turn will also decrease greenhouse gas emissions. They also provide low-emissivity (Low-E) coatings on the glass to protect the valuable possessions inside the home from UV sun damage. Lastly, investing in the energy-efficient replacement windows enhances the home?s curb appeal, boosts its market value, and makes it more saleable.

Clearwater Exteriors offers various kinds of windows, such as: replacement windows, double-hung windows, sliding windows, casement windows, awning windows, accent and specialty windows, bay windows, picture windows, and bow windows. There are many reasons for getting replacement windows, one of which is the fact that window technology has significantly improved during recent years.

Meanwhile, their double-pane, double-hung windows are the most popular among the window styles they offer. In contrast to the single-hung window that only permits the bottom window sash to move up and down, the double-hung window enables both the top and bottom window sashes to open. An important advantage of the double-hung window is that when both top and bottom windows are open, hot air is able to go out through the top while the cool air gets in through the bottom. Also, both the top and bottom windows can be folded for easy cleaning.

Started in 1979, Clearwater Exteriors, has been providing windows services for more than 40 years and is headed by its President, Laurence Meadows, who is an industry veteran and a trusted advisor to manufacturing companies and banks and investment funds in the area of home improvement. He was twice a finalist for the reputable Entrepreneur of the Year Award from Ernst & Young and serves the Joint Center for Housing Studies of Harvard University. He has recently introduced the recently developed ultra-high performance double-pane window to the Denver area. He said, ?With Denver?s weather conditions and the enormous population growth in the area, we know that our double-pane windows are an excellent fit into the energy-conscious lifestyle of Colorado homeowners.?

Their service area includes: Arvada, Aurora, Brighton, Broomfield, Centennial, Commerce City, Denver, Englewood, Evergreen, Golden, Henderson, Highlands Ranch, Indian Hills, Lakewood, Littleton, Morrison, Parker, Thornton, Watkins, and Westminster.

Those who are interested in the various products, such as the Clearwater Exteriors double hung windows, can visit the Clearwater Exteriors website or contact them on the phone or by email. They are open from 8:00 am to 5:00 pm, from Monday to Friday.
