

Montgomery Park Dental, Which Offers Dental Implants in Conroe Texas, Receives Another Five Star Review

July 27, 2023

July 27, 2023 -

Montgomery Park Dental, a dental office in Conroe, TX, which offers dental implants as part of its cosmetic dentistry services, takes pride in having received another five star review. Launched in 2003, Montgomery Park Dental offers high quality restorative, preventative, and cosmetic dental care in Conroe and surrounding areas at a state of the art dental facility.

In the above-mentioned review, the patient who used the alias, brmeme, said, ?Yesterday was my first time at Montgomery Park Dental and they have the best staff! Everyone was so friendly and understanding with my anxiousness. They explained everything that was being done, answered all the questions I had. I am happy to say I have found my new dental home! 10 out of 10 highly recommend! I will be referring my family members to this practice.?

Dr. Carolyn Jovanovic, DDS from Montgomery Park Dental explains the advantages of dental implants, ?Implants provide a natural and secure feeling for the patient. Unlike dentures, which can slip and cause

discomfort for some with everyday activities such as speaking and eating, implants are firmly secured in place and don?t move. In addition, the material used to make implants is biocompatible with the body, meaning that the patient?s body does not reject the implants. This also helps to ensure that the implant is secure and that the patient feels more comfortable with the replacement teeth. Implants also provide a more aesthetically pleasing appearance than some other tooth replacement options, as they look and feel like natural teeth.?

Dr. Jovanovic recommends that the patient visit the dentist regularly to maintain the health of the dental implant. Regular cleanings and check-ups will help to make sure the implant is secure and working the way it should be. During each appointment, the dentist will examine the implant and neighboring tissue for any indications of infection or other problems. Furthermore, it is advisable not to bite down on hard foods or objects to avoid damaging the implant crown.

A remarkable advantage of the dental implant is that it is securely attached to the jawbone, which means it will not move or slip when the patient is talking, eating, or laughing. Dental implants also offer the benefit of the patient feeling more comfortable and secure on contrast to wearing conventional dentures. They can also help in preventing bone loss in the jawbone, which can happen when teeth are missing. This will help maintain the facial structure of the patient. In addition, implants can help in preventing the teeth from shifting and in enhancing speech ability and chewing.

Another cosmetic dentistry service offered by Montgomery Park Dental is the porcelain dental veneer. Dr. Jovanovic explains, ?Veneers are a popular cosmetic dental treatment that can give you a smile makeover by dramatically improving the appearance of a patient?s teeth. These thin layers of porcelain material are custom-made to fit over the surface of the teeth, creating a natural-looking and long-lasting result.?

Despite their thinness, dental veneers are durable and very strong. They usually have a lifespan of 10 years before they need to be replaced. With appropriate care and maintenance, dental veneers can even last up to 20 years or more. Thus, veneers can be a great investment in both the health and appearance of the teeth.

Founded in 2003, Montgomery Park Dental is headed by Dr. Carolyn Jovanovic, DDS, who graduated with distinction from Duke University and earned her masters in public health with concentration in microbial disease from Yale University. She received her DDS degree from New York University College of Dentistry, where she finished an honors program in implant dentistry. She finished her general practice residency at the Washington DC VA Medical Center and practiced general dentistry in private practice for more than decade.

Those who are interested in learning more about the various dental services, including the Montgomery Park

Dental veneers, can check out the Montgomery Park Dental website or contact them on the phone. They are open from 8:00 am to 5:00 pm, from Monday to Thursday.
