

Best Knife Sharpener Now Available Through SliceXL

December 23, 2015

December 23, 2015 - PRESSADVANTAGE -

Christchurch, New Zealand business SliceXL has recently launched its brand new product, a reversible blade knife sharpener. While it was only launched recently, it is already receiving a wealth of positive comments and some are already hailing it as the best knife sharpener on the market. The company has also released a video on its new website that shows how the tool works.

"It is so important for knives to be sharp if they are to function properly," says Vicky Portman from SliceXL. "In fact, blunt knives could potentially be dangerous, as people start to put too much pressure on them. And even if used safely, blunt knives are annoying because they make the task of cooking hard work. Our knife sharpener resolves all those issues and we're so happy to see that it is getting so popular."

The video that the company has released on their website, which incidentally has only recently been launched, gives clear indications on how the tool works and how to use it. The video also clearly shows how to make sure the sharpener is used safely by making it stick to the work surfaces through the included suction caps.

Lloyd Portman from SliceXL added: "Knives are dangerous tools. They have to be sharp in order to function properly, but this does mean they also have the potential to cause injury. Luckily, our knife sharpener is

completely safe to use, as the demo video clearly demonstrates."

Those who have purchased the knife sharpener in the short time that it has been available have been very happy with how it works and the results it delivers. "This sharpener is also very simple and easy to use," says one happy customer. "There is a nice arrow on the top that lets you know which direction to draw your knife through. It says, "Draw knife this way." Therefore, the instructions are simple and easy to follow. Anyone can do this. When I placed my knife in the sharpener, I slowly moved the knife down until I was at the end. I then did it again."

The company encourages everyone to visit their website on <http://www.slicexl.com> for further information.
