

Bridgeview Dental Takes Care Of Austin Community

August 07, 2023

August 07, 2023 - PRESSADVANTAGE -

Texas based Bridgeview Dental is providing general and family dentistry in Austin, Round Rock and the surrounding areas. Residents who wish to maintain their dental health, instill good dental practices in their children or consider the cosmetic options at their disposal are welcome to schedule an appointment with the clinic today.

Given the broad array of services that are available, it is feasible for an entire family to have all their needs taken care of under one roof. The clinic is capable of diagnosing both ongoing and potential issues as well as developing cohesive treatment plans to correct them, and patients can rest assured that they are in the best of hands when they arrive. This is true whether a procedure is as simple as a scaling or root planing (non-surgical cleaning) or more complicated, such as root canal therapy.

The clinic's procedures include dental implants, CEREC same day crowns, dentures and partials, TMJ treatment, extractions and more. There are many corrective procedures available that can adjust or correct a patient's smile as well as ensuring their overall dental health, and Austin residents are invited to consult with the clinic's head dentist, Dr. Lance E. Loveless, to learn more about potential treatments before making a

decision.

The clinic points out that certain procedures may be more popular than others, especially if they have received any exposure in the media, but a consultation will always be provided to ensure a desired Bridgeview Dental treatment is appropriate before continuing. Patients are always welcome to ask as many questions as they need to understand any proposed solution to their dental issues.

As with any service, it is crucial for dental patients to try at least a handful of dentists till they are satisfied with their care. A good service and technical capabilities are important, the clinic clarifies, but they should not be the only factors a patient considers. In many cases, a patient's comfort and state of mind can influence the quality of the care they receive, so they should make an attempt to find a clinic where they feel welcome and relaxed at all times.

Some clinics are better than this than others, and Bridgeview Dental points out that patients – especially children – are more likely to follow expert advice if they trust the team taking care of them. Bridgeview Dental strives to provide such an environment, and the team is proud to acknowledge that many of their patients return again and again because they enjoy the care they receive.

"I had my first appointment here and everyone was so nice!" says one patient in a review. "The office manager, Christine, is extremely pleasant and helpful! The tech who took my X-rays was very gentle and kind! Dr. Loveless is so sweet and caring. The staff is just really nice and supportive of each other. If you get anxious about going to the dentist, please give this office a chance. They are all there to help and it shows. Thanks for a great experience, Bridgeview!"

Patients find Bridgeview Dental through a variety of means, such as recommendations from friends and family or via the clinic's own outreach. However they arrive, Bridgeview Dental says all are welcome.

"I went to Bridgeview from a Groupon," shares a patient. "This is without a doubt the best experience I've had at the dentist. The staff has so much patience and compassion. Their skills and knowledge were really wonderful. I am one of those adults who has a fear of dentist offices, and it is so embarrassing! Sometimes, just having kind people to walk you through stuff makes a huge impact. I will definitely continue my dental work with this office and look forward to purchasing their affordable insurance to get regular cleanings, check ups and discounts off dental procedures. Thank you so so much for your patient care, Bridgeview staff!"

Patients, especially families, who are looking for a dentist in Austin Texas are invited to consider Bridgeview Dental. Appointments can be made over the phone or through the clinic's official email address.
