

JRC Glass Solutions Offers Glazier Services in Brisbane Who Can Install Double Glazed Glass for Windows

August 16, 2023

August 16, 2023 -

JRC Glass Solutions, a company based in Coopers Plains, QLD, Australia, wants to point out that they have a team of glaziers who are experts in the installation of double glazed glass for windows in Brisbane and neighbouring areas. There has been an increasing trend of better energy efficiency in homes in Australia, especially with glass and windows, particularly with the use of double glazed glass. The rapidly rising energy costs in Australia is encouraging homeowners to choose double glazed windows to decrease their energy usage and save on electric power bills.

Jackson from JRC Glass Solutions says, "We are a leading company for all things double glazed windows. We supply, fabricate, and install custom-made double glazed glass that fit the specifications and needs of your home or business. Our versatile range has an option for every need, with a wide range of double glazing products including awning windows, double hung windows, fixed frame windows, sliding windows, and sliding doors. Our glaziers pride themselves on their flawless installation skills, down to the very last detail of your window or door installation."

All of the products used by JRC Glass Solutions have been engineered and tested to ensure they can withstand the harsh climate in Brisbane, remaining durable even during the harshest weather. The windows they install are assured not to bend, warp, or crack under the heat of the sun. They have achieved the reputation of being the top supplier of double glazed windows in Brisbane and have already assisted hundreds of Brisbane homeowners through their high quality double glazed windows and doors. More about the JRC Glass Solutions and their products and services can be gleaned from their Facebook page.

Double glazed windows are more energy efficient because they are made of two panes of glass with a spacer separating them to decrease heat transfer from the outside to the inside of the home. Single pane windows are very poor insulators, which is why double glazed windows are gaining in popularity. Furthermore, double glazed windows are also capable of decreasing the entry of noise from the outside to inside the home, thus offering the benefit of reduced intrusive noise from construction, traffic, barking dogs, noisy neighbors, trains, and more.

Jackson says, "The effectiveness of double glazed windows in comparison to single glazed is incomparable. Double glazed windows are proven to be up to 4 times more effective at insulating the cold and the heat within your home. In fact, it is estimated that up to 90% of all heat gained during summer and half of all heat lost during winter comes through the windows. The thermal engineering of double glazing combats this extreme energy loss by creating an insulation barrier from the outside world."

With only a small additional cost, double glazed windows can help the property owner save on thousands of dollars for electricity costs spent on air conditioning. In addition, the cost of the installation of the double glazed windows will only be made once while the savings on electricity expenses will continue for a long period of time. In addition to reducing noise intrusion, aluminum double glazed windows also need less maintenance and are much more durable and longer lasting compared to single pane wooden windows.

Founded in 2020 by Jackson, JRC Glass Solutions always strives to offer customer satisfaction for every project they handle. Some of the services offered include: aluminum window installation, aluminum door installation, shower screen installation, double glazing, patio enclosures, and glass replacements. The locations they serve include: Brisbane Northside, Morningside, New Farm, Spring Hill, Annerley, Everton Park, Camp Hill, Teneriffe, Woolloongabba, Eight Mile Plains, Nundah, Paddington, Boondall, Banyo, Upper Kedron, Virginia, Carseldine, Newmarket, Sandgate, St Lucia, Bald Hills, Brisbane Southside, Coorparoo, Highgate Hill, Auchenflower, Indooroopilly, Ashgrove, Ascot, Carindale, Graceville, Eagle Farm, Tingalpa, Mitchelton, Zillmere, Kenmore, Wavell Heights, Stafford, Herston, Newstead, Lutwyche, and Clayfield.
