Blackhawk Plastic Surgery Introduces Personalized Mommy Makeover for Post-Pregnancy Body Transformation

August 16, 2023

Danville, CA - August 16, 2023 - PRESSADVANTAGE -

Blackhawk Plastic Surgery & MedSpa, a trusted cosmetic surgery clinic in Danville, CA, has introduced personalized mommy makeover procedures designed to help women regain confidence in their bodies after pregnancy and childbirth. By focusing on specific individual needs and by leveraging advanced technology and the experience of their surgeons, they offer comprehensive services to address stretched skin, stubborn fat, and more. The mommy makeover process includes various procedures, such as breast lift, augmentation, liposuction, labiaplasty, and tummy tuck.

With the procedures custom-fitted for each patient, the procedures are designed to minimize recovery stress while providing transformative results. For those who want a pre-baby body and renewed self-esteem, Blackhawk Plastic Surgery is offering both surgical and non-invasive alternatives for completely customized transformations.

Dr. Stephen Ronan, founder of Blackhawk Plastic Surgery & MedSpa, says, "We offer personalized mommy makeover procedures to help you achieve your ideal body after pregnancy and childbirth. Our

experienced team provides comprehensive services that address your unique needs, using state-of-the-art technology to minimize recovery time and maximize results. Our mommy makeover allows you to choose a variety of procedures, including implants, liposuction and other cosmetic enhancements, which will assist you in achieving the transformation you desire.?

During the initial consultation, the team at Blackhawk Plastic Surgery will perform a thorough examination and discuss the patient's goals and how they can help. They understand that each individual has a different journey, and the specific needs and expectations will have to be addressed individually.

The mommy makeover procedure may include the following: a breast lift to bring back the perky and firm appearance of the breasts; breast augmentation to counteract the volume loss, asymmetry, and deflation; a tummy tuck to address sagging and loose skin and get rid of stretch marks; liposuction to get rid of fat deposits from the neck, arms, waist, back, legs, hips, and buttocks; and labiaplasty to address asymmetry and functionality while providing a more youthful appearance.

Dr. Stephen Ronan says, "Moms tend to seek plastic surgery following pregnancy because exercise cannot address all of the issues that may arise after birth and breastfeeding. Excess skin, for example, will never respond to exercise, so the only option for a flat stomach may be a surgical tummy tuck. The connective tissue (fascia) around your abdominal muscles (6-pack muscles) has been stretched, leaving a bulge in the center of your stomach. There are also hormonal factors that are difficult to control with exercise, so stubborn pockets of fat can develop and get in the way of your ideal figure.?"

Founded in 2003, Blackhawk Plastic Surgery & MedSpa is focused on helping patients feel good about themselves through the improvement of their physical appearance. The practice is found in Danville, California, in the San Francisco Bay Area and serves various places nearby, such as Pleasanton, Alamo, San Ramon, Dublin, Livermore, and Walnut Creek. They offer a complete range of cosmetic products and procedures.

All of the surgeries they provide are done in their ultramodern facility that is adjacent to Blackhawk Plastic Surgery. The center was established by Dr. Stephen Ronan, MD FACS. Having the surgery center in the same building is convenient for the patient because it offers a familiar environment, and the surgeons and staff would be able to personalize the patient's experience from beginning to end easily. In addition to surgery, they provide a complete range of non-invasive procedures, such as Dysport, Kybella, lasers, fillers, esthetician services and more.

Dr. Ronan is an award-winning cosmetic surgeon who does thousands of surgery procedures each year in the Blackhawk Surgery Center. He graduated from the Medical College of Virginia (Virginia Commonwealth University) in Richmond, Virginia where he was given the reputable S. Dawson Theogaraj Scholarship for

Excellence in Plastic Surgery. He completed his training in general and plastic surgery also at the Medical College of Virginia at Virginia Commonwealth University. He has been recognized as one of the Best Plastic Surgeons in America.
