Medicare is the federal health insurance program for people who are 65 or older, certain younger people with disabilities, and people with End-Stage Renal Disease (permanent kidney failure requiring dialysis or a transplant, sometimes called ESRD). Senior citizens in the United States of America become Medicare Eligible when they turn 65 years old and are able to enroll in Medicare. Medigap Medicare insurance coverage is a type of insurance that helps cover the patient expenses that Medicare does not pay for, providing insurance to cover the gap between what Medicare does and does not completely cover. Medicare is divided into parts. Medicare Part A covers inpatient hospital stays, care in a skilled nursing facility, hospice care, and some home health care. Medicare Part B covers certain doctors? services, outpatient care, medical supplies, and preventive services. A Medicare Advantage Plan is a type of Medicare health plan offered by a private company that contracts with Medicare to provide individuals with all their Part A and Part B benefits. Medicare Advantage Plans include Health Maintenance Organizations, Preferred Provider Organizations, Private Fee-for-Service Plans, Special Needs Plans, and Medicare Medical Savings Account Plans. If one is enrolled in a Medicare Advantage Plan, Medicare services are covered through the plan and aren?t paid for under Original Medicare. Most Medicare Advantage Plans offer prescription drug coverage. Medicare Part D adds prescription drug coverage to Original Medicare, some Medicare Cost Plans, some Medicare Private-Fee-for-Service Plans, and Medicare Medical Savings Account Plans. These plans are offered by insurance companies and other private companies approved by Medicare. Medicare Advantage Plans may also offer prescription drug coverage that follows the same rules as Medicare Prescription Drug Plans.
