

Safe Laser Therapy LLC Is Offering Detoxification Treatment In New York And Connecticut

December 07, 2023

December 07, 2023 -
Safe Laser Therapy, an eco-friendly wellness clinic in Stamford, CT, is offering clients state-of-the-art laser therapy for detoxification.

Toxins have infiltrated every aspect of daily life. From environmental pollution to processed foods and goods to prescription medications, the human body is being bombarded with chemicals that it is not equipped to process or digest. The result of the accumulation of toxins in the body can be slow metabolism which leads to extreme fatigue, weight gain, and a range of other frequent illnesses which are difficult to diagnose and treat.

Malti Gupta, the founder of Safe Laser Therapy, says, ?The body can?t keep up with the assault of toxins which have seemingly penetrated the air we breathe, the water we drink, and the food we eat. Its response to these foreign agents is the same as its response to fighting off germs and illnesses. When the body works to cleanse you from the toxins, it lessens its ability to fight viruses and germs, leading to a host of illnesses.?

The body?s natural detoxification systems include the bowels, skin (sweat), lungs, urinary tract, and the linings of the nose, eyes, and lungs. However, when they are overwhelmed with heavy metals due to polluted air or processed foods, or engaging in activities like smoking, they cannot keep up. Thankfully, Safe Laser Therapy offers far infrared body wraps to combat the high concentration of toxins in the body.

Infrared wraps use the far wavelengths of the spectrum to produce a sense of gentle warmth on the skin. However, unlike the warmth of the sun, which contains UV radiation, infrared laser therapy is completely safe. Infrared wraps target the pathways in the body that are responsible for processing and eliminating toxins. The two main systems it targets are the skin and the digestive tract.

"FAR InfraRed wraps are a thermal-based laser treatment built into a ?wrap,? that looks and feels kind of like a sleeping bag,? says Gupta. ?The wrap covers the full body from the neck down, as laser lights inside prompt a release of moisture through the sweat glands. The wraps penetrate several layers of skin to release toxins stored deep in the fatty tissue. Soon, the perspiration released draws the toxins out onto the skin to be washed away. So, infrared technology helps the body produce seven times more sweat as exercise and helps it expunge toxins like cadmium, arsenic, mercury, and lead from the body."

Malti Gupta and the rest of the staff over at Safe Laser Therapy LLC have been repeatedly praised by its clients in New York and Connecticut for delivering real results with compassionate care. The clinic?s Google Business Profile boasts a perfect 5-star rating from nearly 25 reviews with clients particularly noting Malti?s knowledge and skills as well as the staff?s responsive customer service.

A recent review says, ?Malti is a pleasure to be around. She is extremely informative and patient. I am currently doing an infrared detox treatment and I feel like I am getting good results as I was trying to target certain areas for weight loss. I have noticed that my skin is much tighter and I am looking forward to seeing the end result. I?m really impressed thus far and looking forward to my third treatment.?

Another client writes, ?I am not a smoker. Not anymore. Malti changed my life. She will change yours, too. I was a chain smoker for 20 years. Loved smoking but finally knew it was time to quit. Though I was ready, I enjoyed my last cigarette on the way to Malti?s office. When I left her office, I was a non-smoker. Three months and counting, I?ve never smoked again. It?s almost as if it never happened, my smoking history wiped clean. It?s simply a non-issue in my life now. Simply, not on my mind. I am free.?

Readers in New York and Connecticut can contact Safe Laser Therapy at (203) 601-7772 to inquire about its services or to book an appointment.
