

Safe Laser Therapy LLC Is Offering Skin Rejuvenation Treatment In New York and Connecticut

December 14, 2023

December 14, 2023 -
Safe Laser Therapy, an eco-friendly wellness clinic in Stamford, CT, is offering clients state-of-the-art laser therapy for skin rejuvenation.

There are hundreds of treatments for skin conditions but the majority of them involve some kind of ointment or oral medication full of chemical and non-natural compounds. While some skin conditions need prescription medications, it is always advised to take an organic approach that doesn?t cause side effects such as allergic reactions or inflammation.

Low-Level Laser Therapy (LLLT) is a safe and effective treatment option for a wide range of chronic and infrequent common skin conditions such as acne, rosacea, eczema or psoriasis, wound recovery, skin tightening, and more. Skin conditions are easily treated with laser therapy because the light penetrates deeply into the skin and cells respond well to it.

Dr. Malti Gupta, the founder of Safe Laser Therapy, explains how laser light therapy works to treat skin conditions by saying, ?Laser light emits trillions of photons concentrating a large amount of energy on a smaller area. The natural energy of particular wavelengths, then, stimulates healthy cells and triggers the growth of new skin cells. Unlike ordinary light, laser photons move in waves that scientists call ?in phase,? which means the energy is not put out with ?heat? which dissipates quickly, but more slowly, so more energy can be absorbed and spread throughout tissue and into cells.?

The treatment is also effective at promoting younger-looking skin. A beam of laser light destroys the outer superficial layers of dead skin and heats the underlying layers. This energy focused on the deeper skin cells speeds up the production of collagen and results in much-improved skin tone and texture.

Lasers are also effective on skin conditions related to inflammation. For example, acne is caused, in part, by clogged pores that trap bacteria. Laser cleans out pores and hair follicles and encourages the healthy production of new cells that line the pores and hair shafts. So, older, dead skin is removed, and new skin cells emerge, leaving the skin clean and appearing fresh.

?Treatment at the clinic can last anywhere from half an hour to two full hours depending on your goals,? says Dr. Gupta. ?For faster healing of deep wounds, there may be multiple applications of laser light done over the course of weeks or months depending on their severity. Laser therapy is respected as a treatment because it speeds up the body?s own healing process significantly, assisting in the production of new skin cells.?

Safe Laser Therapy LLC?s clients from New York and Connecticut have time and time again expressed their approval of the services provided by Dr. Gupta and her team. The clinic even boasts a perfect 5-star rating on its Google Business Profile from almost 25 reviews with clients praising Dr. Gupta?s expertise in cold laser therapy, the professionalism of the supportive staff, and customer service.

A recent review says, ?I started going to Safe Laser Therapy about 2 months ago. As a future bride, I wanted to lose inches and feel less stressed. It really does wonders! I have gone 2-3 times a week and feel amazing when I leave. I feel lighter, rested, my sleeping is 100% better, and I have lost inches and pounds! Malti is wonderful and she really wants me to succeed and feel great on my big day! Highly recommend it!?

Another client writes, ?Malti is a very unique woman, a caring healer, and a wise woman. Healing people from the curse of cigarettes is clearly her passion. She explained that she cured the physical addiction to nicotine and gave me detailed counseling on actions and nutrition to support my new lifestyle. I followed every instruction to a tee. After the treatment, Malti followed up several times out of care and concern. This is her passion.?

Readers in New York and Connecticut can contact Safe Laser Therapy LLC at (203) 601-7772 to inquire about its services or to book an appointment.
