

STEVENS Engineers & Constructors Provides Construction Services for Oil and Gas Industry

August 21, 2023

Middleburg Heights, Ohio - August 21, 2023 -
STEVENS Engineers & Constructors, a company based in Middleburg Hts, OH, wants to emphasize their industrial construction services for the oil and gas industry. They design and construct oil and gas projects custom-fitted to the company?s specialized systems, equipment, and facilities. They are an experienced construction partner for oil and gas companies and can help with heavy rigging, pouring concrete, excavation, pipelines, or steel fabrication.

CEO of STEVENS Engineers & Constructors, Vicki Anderson, says, ?We offer design, fabrication, and construction for the major domestic shale formations. Our team offers construction services for your gas construction project, including: contracting, construction management, scheduling, procurement, project management, feasibility studies, construction engineering and automation, start-up services, excavation, dewatering, and pre-engineered structural buildings. We also fabricate and install compressor and metering stations, dehydration units, pig launchers and receivers, slug catchers, stabilizers, and flare stacks.?

It is important to note that STEVENS provides various industrial construction needs. Industrial construction involves factories, warehouses, power plants, and other highly specialized facilities. It also includes the design, installation, and maintenance of the different structural and mechanical elements of these facilities. STEVENS uses building information modeling (BIM) to ensure they can provide the best outcomes. They also take pride in delivering industrial construction solutions for companies of all sizes and types.

Industries served by STEVENS Engineers & Constructors are the oil and gas industries and the power and energy companies. The oil and gas industries are arguably one of the biggest sectors, and have extensive experience working on oil and gas projects. They can provide construction services, including feasibility studies, construction management, engineering, and excavation, to help deliver to clients the required results.

Vicki Anderson says, ?We work in a wide range of industries, from industrial manufacturing to renewable energy. We bring our experience and expertise to each one of our projects. No matter how big or small the construction project is, our professionals are constantly working to be ready to be a part of every breakthrough. Through our decades of experience in the industry and our commitment to safety, we want to help you with your oil and gas project. We have been engineering and constructing a full range of industrial projects for clients in many challenging markets throughout the United States.?

Started in 1970, STEVENS Engineers & Constructors has more than 75 years of experience in delivering high-quality construction services. They began as Stevens Painton Corporation in February 1970 after Stevens Construction, established in 1919, merged with Eddie Painton and Associates, which was launched in 1915. STEVENS Painton was a highway bridge builder and an excavation contractor providing their services mostly for wastewater treatment plants, but they gradually moved towards heavy industrial construction. In 1991, they acquired CDMG and introduced industrial engineering as part of their services. In 2009, the company became STEVENS Engineers & Constructors, Inc., focused on earthwork, demolition, heavy rigging, excavation, and civil concrete. They also provide construction management and plant maintenance, mechanical equipment setting and alignment, structural steel erection, and shutdown and turnaround services.

Those wanting to know more about their oil and gas construction company services can check out the STEVENS Engineers & Constructors website or contact them via phone or email.
