April 02, 2015 - PRESSADVANTAGE -

Options Income Engine by Bill Poulos, a forex and trading professional, has announced the availability of the Options Income Engine Review, which covers important aspects of this new product that is making a buzz in the financial media. For more information on the Options Income Engine and what it does, the company has encouraged potential users of the product to watch a YouTube video, which can be found at <https://youtu.be/tzG8eMi9Z2k>.

Following the Options Income Engine Review at YouTube gives investors an insider's view of how the system works, and displays a visual guide of a typical trade in action. It also gives data on how the tool communicates with users through real time, sending messages so that traders don't miss out on crucial trading moments.

Other administration tools supplied by the program, and mentioned in the Options Income Engine Review, include an easy to use interface with good aesthetics, A United States master list, and other functions that demystify the trading process. Bill Poulos recommends potential users to Get Instant Access Here. He has made the following statements regarding the makeup of the system and what it means for those who use it:

"These are like the DNA or the "secret sauce" that took me years of research and trial & error to perfect. And once you know the trading rules, that's when the real power of unlocking the most profit potential trading begins."

Traders and investors alike can purchase the system through the Options Income Engine website for \$83.00 per month, and the company is currently offering a \$194 discount. Those customers who are not fully satisfied with how the system works can get their money back through a 100% full satisfaction guarantee offered for the first two months of usage. For the moment, the tool is offered to any country at any time through online sales, and it is web based, which means that there is no need to download software and clutter storage space on a hard drive.

Bill Poulos makes it clear through the review that there is only one real rule that goes along with the Options Income Engine, and that is that traders take responsibility for their trades. Although the system has shown some large scale success for many users, it is not a 100% sure fire guarantee to make money. This honesty helps build the Options Income Engine brand into something that seems more reliable, and the company reflects this through Bill's acknowledgement that he only wants to work with like-minded people who are willing to work for success.

The Options Income Engine is a short time offer with limited enrollment to keep numbers manageable and allow all students to receive the right training.
