GetDandy Launches State-of-the-Art AI Powered Communication Platform Transforming Customer Experiences & Automating Interactions

August 28, 2023

Irvine, California - August 28, 2023 -
AI-powered reputation automation platform GetDandy is highlighting the many ways in which it can help business owners leverage customer reviews to build a long-lasting positive online reputation.

GetDandy?s suite of software services takes the burden of managing a business?s online reputation off its clients? shoulders. With a range of products, including review removal, review aggregation, reputation management, reputation monitoring, review generation, surveys, reporting, web chat, and guest feedback QR codes, GetDandy is an all-in-one solution that helps business owners track what their customers are saying about them across multiple review sites and remove fraudulent reviews that harm their reputations.

?The customer experience is at the core of what GetDandy does,? says the spokesperson for the company. ?With GetDandy, you can eliminate the friction that they have in posting an online review. So, you get more positive reviews from customers who have had a good experience with you, drowning out the negative reviews that may originate from disgruntled ones or even unethical competitors. You also get the benefit of automated review replies powered by ChatGPT that ensures your customers feel like they have been heard

and reduces the chance of receiving illegitimate reviews.?

GetDandy makes it easy for businesses to stay on top of what customers are saying about them in online reviews. The system is fully automated, enabling business owners and managers to dedicate their time toward running their ventures while the software platform identifies negative reviews, finds ways in which they can be appealed with the corresponding review site, posts auto-generated replies to real reviews and encourages satisfied customers to rate the business online.

The company offers NLP and ML-driven review legitimacy scoring, a proprietary technology to identify if reviews or review contributors are in violation of any ToS. The reviews are programmatically disputed over a range of platforms including Google, TripAdvisor, Facebook, and more. GetDandy also offers ChatGPT-powered automated review replies that use local SEO optimization and AI to craft responses that are authentic, personal, and unique. Finally, all these features are available in one place, on its online dashboard, streamlining the entire process and making monitoring reviews fast and simple.

To date, GetDandy has helped successfully remove over 50,000 negative online reviews for its clients operating across a wide range of industries including healthcare, dental, real estate, home services, retail, legal, financial services, hospitality, automotive, restaurants, insurance, personal services, and more. Some of its most well-known clients include large corporations such as Holiday Inn, Super 8, Wyndham Hotel Group, Midas, Berkshire Hathaway Home Services, and many others.

The spokesperson adds, ?Our track record speaks for itself. Head over to our website to read through several case studies on how we helped businesses like yours fight the scourge of bad reviews and emerge successfully with a clean, rock-solid online reputation. When you are ready to find out more about how the system can be integrated to work for your business, schedule a free 15-minute demo and let us help you understand what GetDandy can do for you.?

GetDandy has received several testimonials from clients vouching for the system?s efficacy in fixing their online reputation. Kevin Burke from Atlantic Homes says, ?You guys at GetDandy handled our negative review removal quickly and professionally. It was affordable. Unfortunately, not-so-great people post bad reviews, and you need to force them to take them down. You guys did a great job. I really appreciate it. Recommend.?

Karen from Kaerbear?s Healthcare says, ?I just like to say thank you for all the work that you do. I?ve been a happy client of GetDandy since February 2022. You have definitely provided a great way for a business owner to not have to worry about reviews. It is a fast, efficient, and affordable way for a business owner to manage their online reputation without having to micromanage it.?

Readers who want to find out more about GetDandy are urged to visit its website and sign up for a free demo with the company?s representatives.
