

Patient Praises Resurgence Behavioral Health's Staff for Going "Beyond the Call of Duty"

August 22, 2023

Costa Mesa, California - August 22, 2023 -
Costa Mesa, California ? A woman who got help with addiction treatment is praising the staff and the experience she had at Resurgence Behavioral Health.

In a top review on Google, Nicoli called the drug and alcohol addiction treatment center in Costa Mesa ?amazing,? going on to praise specific members of the Resurgence team that help people overcome addiction and achieve lasting recovery.

?The staff went above and beyond the call of duty. Especially Amber, June, Claudia, and Ernie and Diago,? she wrote in her five-star Google review. ?I?m going to miss you.?

Resurgence offers full-service residential programs for drug and alcohol addiction treatment in a safe, comfortable, amenity-packed facility. When people come to this Costa Mesa center for help, they?re met with unexpected amenities that set this place apart from other options for addiction treatment in California ? things

like an on-site chef, TVs in the rooms, exercise areas, off-site outings, and game or movie nights. Resurgence is also unique for allowing things that aren?t necessarily the norm at drug and alcohol rehabs, such as allowing couples, pets, and even smoking.

In addition to this calm, healing environment with top amenities to make the experience for patients as comfortable and home-like as possible, the treatment center is known for the experts and highly-trained staff who work here, helping people overcome their struggles with addiction and learn the skills they?ll need to remain sober long after treatment is over.

?I would recommend this place to anyone needing help,? Nicoli continued in her Google review.

Resurgence Behavioral Health offers medically assisted detox, inpatient treatment, and outpatient treatment options, as well as aftercare programs and referrals to supportive sober living houses once treatment is over.

The addiction treatment center also accepts most PPO insurance, backing up its commitment to making top drug and alcohol addiction treatment accessible to as many people as possible.

But it?s not just addiction that?s treated at Resurgence, because addiction often goes hand in hand with co-occurring disorders like mood disorders, anxiety disorders, psychotic disorders, personality disorders, and eating disorders. The staff at Resurgence are also well-versed in treating trauma-related disorders and mental health disorders in general.

Resurgence Behavioral Health offers a full continuum of care for individuals addicted to drugs or alcohol. Medical detox targets an individual?s physical dependence on drugs or alcohol. At Resurgence, they offer clinically supervised detox, providing clients with a safe environment and empathetic care. Their clinicians also offer treatments designed to reduce the severity of withdrawal symptoms so that clients can detox in comfort. Individuals living with substance use disorders may also display symptoms of trauma, a co-occurring mental health issue that needs to be addressed during rehab. Resurgence's staff uses a trauma-informed approach to uncover the relationship between addiction and traumatic experiences.

It?s the individualized treatment programs, customized and tailored to each person?s unique circumstances, needs, and histories, that sets Resurgence apart in its ability to effectively help people break the chains of addiction. Part of this work includes the involvement of the family in the treatment process, such as through family therapy and family counseling. Residential patients will typically go through 30-day, 60-day, or 90-day treatment programs, though extended stay and sober living programs are also an option.
