Sydney Cosmetic Dentist Wahroonga Family Dental Care Unveils Invisalign Treatment - Elevating Confidence through Transformative Smiles

November 30, 2023

November 30, 2023 -
Wahroonga Family Dental Care, a family dental practice based in Wahroonga, NSW, is now offering Invisalign clear aligners treatment to local patients.

Invisalign is a groundbreaking orthodontic treatment that has transformed the way people smile. Unlike traditional braces, which rely on metal wires and brackets, Invisalign utilizes a series of custom-made, clear aligners to gradually shift teeth into their desired positions. It is a popular choice for both teenagers and adults seeking a more discreet, comfortable, and convenient path to a straighter smile.

Dr. Alfred Tsang, spokesperson and principal dentist at Wahroonga Dental, says, ?One of the primary advantages of Invisalign is its near invisibility. The aligners are constructed from a clear, medical-grade plastic, making them virtually undetectable when worn. This discreet nature allows individuals to undergo orthodontic treatment without being as self-conscious as they might have been if they had opted for

traditional metal braces. Many of our patients report that opting for the Invisalign procedure has boosted their self-confidence and made them happier about their overall dental health.?

Invisalign aligners also offer several other benefits. For example, since they are removable, eating, drinking, brushing, and flossing with Invisalign is far more convenient compared to braces. It also reduces the risk of oral hygiene issues and encourages better overall dental health during treatment.

When asked about the dental clinic?s Invisalign procedure, Dr. Tsang says, ?It begins with a consultation during which we assess your dental condition and create a customized treatment plan. Advanced computer technology, including 3D scanners and X-rays, is employed to design a series of aligners, each slightly adjusted from the previous one to guide the teeth into the desired positions gradually. Patients typically wear each set of aligners for about two weeks before progressing to the next set. We also set up regular check-ups to monitor your progress. The length of treatment varies depending on the complexity of the case but typically ranges from several months to a couple of years.?

Wahroonga Family Dental Care offers comprehensive dental health services designed to enrich the oral health of the entire family. Principal dentists Dr. Alfred Tsang and Dr. Andrew Freelander boast decades of experience offering a full spectrum of dental treatments in a world-class environment with state-of-the-art technology.

The Wahroonga cosmetic dentist practice has received tremendous praise from its patients for offering affordable and compassionate dental care for all ages. The dental clinic even boasts a perfect 5.0 out of 5.0 overall rating on its Google Business Profile from almost 20 reviews. Patients especially thank Dr. Tsang for helping them maintain their dental health for over a decade.

One reviewer writes, ?Our family has been using this dentist for many years. They are very professional and honest, reasonably priced, and amazing with kids. Our child's most recent visit was made much more pleasant by Dr. Alfred Tsang and his team. We are very happy and can only recommend.?

Another patient writes, ?Dr Alfred Tsang has been looking after my teeth for the last 25 years - and I would never go to anyone else. He is excellent - professional, knowledgeable, gentle - and also just a lovely, genuine person. I now live a long way from Wahroonga yet our whole family still makes the trip to see Dr. Tsang. He is now starting orthodontic work on my 9-year-old and I know my son is in expert hands. 10 stars!?

The full range of services offered by Wahroonga Family Dental Care includes children?s dentistry, general dentist services, orthodontics treatments such as non-extraction orthodontics, growth guidance, clear aligners, ceramic braces, and lingual braces, snoring and sleep apnea, cosmetic dentistry treatments such as dental veneers, teeth whitening, and cosmetic contouring, restorative dentistry treatments such as dental

implants and crowns and bridges, and emergency dentistry treatments such as root canal treatment and wisdom tooth removal.
