

TR Industrial Construction: A New Vanguard in Industrial Infrastructure

September 08, 2023

Lincoln, Tennessee - September 08, 2023 - PRESSADVANTAGE -

Presenting a Comprehensive Suite of Construction Services, from Industrial Distribution to Equestrian Arenas and More.

The market welcomes TR Industrial Construction, a pioneering force in the industrial building sector. With a robust portfolio ranging from Industrial Distribution Facilities to Airplane Hangars, Gymnasiums, Equestrian Arenas, Automotive Dealerships, Full Service Car Wash, and Rail Distribution Centers, TR Industrial Construction is set to redefine industry standards.

Why TR Industrial Construction is Making Waves through several core initiatives outlined below.

Unparalleled Expertise: With a legacy spanning over two decades in construction and management, TR Industrial Construction is poised to take on roles as a General Contractor or Construction Manager, seamlessly navigating the complexities of any project.

All-Encompassing Management Services: The experienced team at TR Industrial Construction promises

impeccable construction and project management services, ensuring every venture they undertake concludes on schedule and within budget.

Promised Efficiency: Opting for TR Industrial as a subcontractor means clients are ensured a swift, seamless process. Their unique ability to self-perform large parts of projects means fewer hiccups and more streamlined schedules.

Cost-Savvy Approaches: The company's vast on-ground experience equips them to offer solutions that are economical yet uncompromised in quality. Their proactive approach as a subcontractor drastically reduces potential delays or costly reworks.

Industry Expertise at Your Fingertips: Collaborating with TR Industrial Construction grants clients unparalleled industry knowledge and insights, ensuring project outcomes exceed expectations.

Adaptable Engagement Models: Recognizing the fluctuating demands of the construction industry, TR Industrial Construction offers flexible engagement options, ensuring resources are utilized optimally.

Their service offerings include Construction Management & General Contracting, Design Build, Self Performance, Subcontracting, and Design Consultation, showcasing TR Industrial Construction's comprehensive approach to the industry's needs.

As a self-performance construction contractor, their in-house team enables them to offer a holistic approach to construction projects. By leveraging in-house resources and expertise, they can provide clients with enhanced quality control, better cost efficiency, and more consistent communication throughout the project's duration.

As the industrial sector continues to evolve, TR Industrial Construction stands out as a beacon of reliability and expertise. Their commitment is to delivering structures built to last and ensuring a construction experience that's efficient, seamless, and value-driven.

They are uniquely suited to assist in manufacturing facility construction, especially in areas where corrosion or bad weather may be an element in the lifetime of a building. Salt storage buildings, chemical manufacturing facilities and chemical warehousing facilities are just some examples of buildings they provide. Often, these buildings need additional landscape mitigation surrounding the property to meet EPA guidelines. TR Industrial has the experience you need to help navigate and meet these regulations.

Distribution facilities also make up a large portion of their work. Often, distribution centers and warehouses are terms that are used interchangeably due to their role in storing goods. While both serve as storage

facilities, warehouses are designed to hold goods for an extended period, whereas distribution centers temporarily house items until they're dispatched to their final destination. Distribution centers can cater to a variety of storage needs. For instance, some distribution centers, akin to refrigerated warehouses, specialize in cold storage, ensuring products remain chilled before they are delivered. These high-traffic facilities are a key piece of the type of projects TR Industries regularly takes on.
