Dental Implants Tasmania Now Part Of Innova Dental

September 25, 2023

Launceston, Tasmania - September 25, 2023 -
Launceston, Tasmania based Dental Implants Tasmania is pleased to announce that they are now a part of the Innova Dental network. Dental Implants Tasmania is focused on providing high quality dental implants and full-mouth dental implant treatments for their patients in and around Tasmania.

Dr. Bing Lee from Dental Implants Tasmania says, ?From the beginning of our clinic?s operations, my team and I have had our patients? dental health and hygiene as our biggest priority. We have worked hard every day to ensure that we are able to provide nothing less than top-notch services to every one of our patients. With us becoming part of Innova Dental, we are pleased to say that none of that has changed. In fact, we are now able to provide our services to more patients and are looking forward to doing so.?

Dental Implants Tasmania has always worked hard to fill in the gaps in what the local dental practices in Tasmania were offering the community. Not only is it the only practice uniquely dedicated to dental implants and All-on-4, but the purpose-built practice is also able to offer several innovative tools and technologies that make a huge difference to patient care.

Their services utilize 3D Printing Technology to create implants in-house by using advanced 3D printing technology. This means that there is no need for patients to endure delays while impressions are sent away to the lab. The clinic also makes use of a Primescan intraoral scanner, which allows them to create intricate 3D models of a patient?s mouth and jaw in an instant, enabling them to diagnose and plan treatments with incredible accuracy. Dental Implants Tasmania further uses advanced printing technology to create custom-made surgical guides, thereby achieving true accuracy and optimal alignment for all implants.

Dental Implants Tasmania was built upon a passion for surgical and reconstructive dentistry and a determination to use innovative digital technologies to provide superior patient outcomes. The clinic?s legacy began back in 2015 when Dr. Bing started his own practice, Prospect Family Dental, in Launceston with his wife Dr. Fay Chan. They?d noticed that there was a gap in what the local practices in Tasmania were offering

the community, and it was a gap they knew they could fill in more ways than one. They brought with them years of experience in CAD CAM chairside technology and were the first practice in Launceston to offer same-day handcrafted porcelain crowns.

Over the years, the Innova Dental practice evolved and from this, Dental Implants Tasmania then grew out of that. Today, Dr. Bing Lee and his wife are at the head of a combined 10-chair dental group with a team of 10 dentists, a prosthetist and dedicated support staff serving the people of Launceston, Prospect and surrounding areas in general, cosmetic and implant dentistry.

The quality of the dental implants provided by Dental Implants Tasmania and the team?s reliability have earned them great praise from their patients. In a Facebook review, Ana Ana writes, ?Excellent consultation by Dr. Bing with respect to a possible implant I was considering. Innova had a state-of-the-art scanning machine that was able to provide a great 3D simulation of what the implant may look like. Dr. Bing was clear and thorough. I would highly recommend Innova to anyone looking for a modern, progressive practice in Tasmania!?

Shann Davie writes in their review, ?What an amazing dental clinic! So welcoming and friendly. Appointment was on time. All the latest gadgets and gizmos. Got a check up, X rays, clean and polish and dental plan made all for the capped price of $199. Staff are understanding of my financial situation and helped me make a plan to work within my budget. Even though this means I'll need more appointments over a long time, it works for me. Highly recommend it.?

Anyone who wants to learn more about Dental Implants Tasmania and the broad range of dental implant-related services they provide should visit their website for more information. Dr. Bing Lee also encourages anyone seeking dental implants to get in touch with the clinic directly, either via phone or email, for any additional questions or concerns.
