Peppy Redefines Indoor Air Quality in Boise with AccuClean Whole Home Air Cleaning System

September 27, 2023

Boise, Idaho - September 27, 2023 -
Boise, ID based Peppy Heating and Cooling has shared new insights on the AccuClean® Whole Home Air Cleaning System and why it represents the next step in indoor air purification. Homeowners who are dissatisfied with the limitations of air filters may wish to learn more by reading the company?s full article, available for free on the official Peppy Heating and Cooling website.

There are many reasons why a person or family would seek to invest in the improvement of the indoor air quality of their home. This structure, after all, is where they live, and maintaining a healthy interior is key to minimizing the occurrence of many health problems. It can also make a home more pleasant to inhabit, especially if the surrounding environment is frequently exposed to some sort of pollution or other airborne substance that then makes its way indoors.

This is why Peppy Heating and Cooling seeks to help everyone in the community improve the indoor air quality of their Boise home, and the company says the best solution currently available on the market is the AccuClean Air Filtration system. Built by American Standard, a manufacturer that has been raising the bar for homes across the nation for more than a century, Peppy Heating and Cooling?s article identifies the AccuClean Air Filtration system as the gold standard in indoor air purification.

President of Peppy Heating and Cooling Brett Shannon comments, ?All of us unfortunately breathe in more allergens than we?re aware of, and the impact of this can vary from individual to individual. In some cases, you may simply have to endure mild discomfort, but anyone with allergies or asthma in your household will likely have a worse experience. However, you don?t have to tolerate being less than perfectly comfortable in your own home anymore, and the same is true for your family?s health and peace of mind. AccuClean is the answer you are looking for.?

According to the article, AccuClean can be described as a comprehensive and versatile solution for indoor air

quality. This is due to the fact that it works in conjunction with the property?s own heating and cooling system to clean up to 99.98% of airborne allergens from filtered air. This means purification can be achieved up to 100x better than filters alone can accomplish, and given the system is attached to the AC or furnace, this effect is replicated throughout every room in the home.

This pales in contrast to other solutions that many may have come to rely on for years, such as plug-in air cleaners (which operate in a single room). In fact, AccuClean does the vast majority of its work right at the filter, utilizing patented IFD technology to remove up to 99% of airborne particulates at this point. AccuClean can be bought through authorized American Standard Distributors and Dealers, and Peppy Heating and Cooling is pleased to confirm that it is indeed available through their Boise offices.

Shannon adds, ?Clean air starts with better air flow ? this is why we chose American Standard AccuClean and their patented system which removes 99.98% of allergens.? The system is able to clear the air of dust, pollen, pet hair mildew, fungus, most tobacco smoke, cooking grease and more. This robust defense is why the system is also certified asthma and allergy friendly by the Asthma and Allergy Foundation of America.

AccuClean can catch particles down to 0.3 microns in size, and the benefits of cleaner indoor air extend beyond allergens alone. For instance, the AccuClean Whole-Home Air Cleaner has been shown to remove the surrogate for the virus that causes COVID-19 in a short period. This overwhelming strength comes with another significant bonus: homeowners will no longer need to buy disposable filters once AccuClean is installed. A vacuum is all that is needed to clean it out.

The article notes that there is no reason to settle for anything less than the best at home. This is why Peppy Heating and Cooling recommends AccuClean for anyone who suffers from allergies, asthma and so on (or anyone who wants cleaner air in their home).

Homeowners and other interested parties are invited to contact Peppy Heating and Cooling for more details about the AccuClean system and its potential impact on Boise homes. The company can be reached via phone or email.
