

Main Street Dental Care Is Offering High Quality Dental Implants To Patients In McGregor, Texas

September 28, 2023

September 28, 2023 -
Main Street Dental Care, a dental clinic serving McGregor, Texas, is sharing valuable information about its dental implant procedures ? what they are, their benefits, and what to expect during the procedure.

A dental implant is a screwlike post implanted into the jawbone during a surgical procedure to replace a tooth?s root and provide support for an artificial tooth or teeth. Dental implants are the closest thing to natural teeth in terms of their look, feel, and function and make great replacements in case of tooth loss, especially for those who are self-conscious of their smiles.

?Dental implants can help you gain back your confidence,? says Dr. John Shultz from Main Street Dental Care. ?More than the aesthetic transformation, dental implants are also crucial to overall dental health. For example, over time, a missing tooth may result in jaw bone atrophy. So, untreated tooth loss can cause noticeable changes in your facial features such as a gaunt appearance or hollowed cheeks. Dental implants can prevent this from happening.?

Dr. Claudia Raimondo shares more information about the dental implant procedure by saying, ?We begin by removing the decayed or damaged tooth if it is not yet missing. We also perform bone grafting if needed. Next, the implant post is placed into position and the bone is allowed to heal. This takes several months and the process, called osseointegration, provides a firm foundation for the replacement tooth. Once healed, patients can return for the implant crown or implant denture creation and final attachment.?

Patients can choose between two different types of porcelain crowns - Porcelain fused to metal (PFM) and All Porcelain. PFM crowns are made with a metal base and a customized porcelain crown on top which is commonly used for the back teeth to maintain the bite force of molars. All porcelain crowns do not have a metal base and look the most like natural teeth. They are often used for the treatment of front teeth which are more visible when speaking and smiling.

Dental implants have several benefits. Firstly, since dental implant surgery involves replacing the tooth root with a titanium post, patients can use their replacement tooth just like a natural one to restore chewing function. Next, with today?s high-quality dental materials, Main Street Dental Care can craft aesthetically convincing dental implants that offer the most natural-looking results. Finally, dental implants restore jaw bone stimulation that is lacking after tooth loss, helping to prevent bone deterioration.

Main Street Dental Care offers a range of services including general dentistry services such as cleaning, exams, and X-rays, children?s dentistry, periodontal care, root canals, and tooth extraction, cosmetic dentistry services such as dental bonding, porcelain veneers, teeth whitening, traditional braces, and clear aligner orthodontics, and restorative dentistry services such as dental bridges, dentures, porcelain crowns, and dental implants.

Main Street Dental Care has received the love and admiration of McGregor residents for offering timely and compassionate dental treatments to individuals and families. The dental clinic boasts a near-perfect overall rating of 4.9 out of 5.0 on its Google Business Profile from over 60 reviews with customers praising its responsive staff members, the wide array of treatments and procedures available, and the helpful customer service.

One reviewer writes, ?Just had my second visit here. The staff is amazing! I will never go anywhere else! They are so friendly and professional that I had no problem relaxing. They did an outstanding job with my dental work and I love the results! Their office is very clean, organized, and professional. Don't hesitate to give them a try! I will always go here for my dental work!?

Another patient says, ?I have been a patient at Dr. Shultz?s office for a few years now. I have had several cleanings, fillings, X-rays, and also had braces for a little over a year. Dr. Shultz and his team have helped

me feel comfortable during tough procedures and made me feel welcome. I have never had a negative experience at this office. I highly recommend this family-oriented dental office!?

Readers can contact the McGregor dental clinic at (254) 414-0716 to inquire about Main Street Dental Care porcelain veneers or to schedule an appointment.
