

Mallard Creek Dental Offers Dental Implant Services in Taylor Texas

September 28, 2023

September 28, 2023 - PRESSADVANTAGE -

Mallard Creek Dental, a dental office in Taylor, TX, provides dental implants services as provided by Dr. Richard Brannock and his team to patients in Taylor, TX and surrounding areas. Dental implants are intended to be a permanent treatment solution for lost or missing teeth. Important advantages of having dental implants rather than dentures is that they function very much like the original tooth, which means it is easier to speak and eat. And patients simply need to brush and floss them regularly, just like regular teeth.

A spokesperson for Mallard Creek Dental says, "If you want to replace missing teeth, there is a chance that dental implants can be right for you. Dr. Brannock offers complete dental implant services in Taylor, TX. It would be our pleasure to review your treatment options and see if you are a candidate for a dental implant. Contact us today to make an appointment."

It is important to note that there are several criteria to be a candidate for dental implants. First of all, the jaw of the patient has to be healthy and dense enough to allow the insertion of a metal screw, which serves as

the base for the dental implant. Second, the patient must accept responsibility in taking care of the dental implant. Third, the jawbone must have finished growing before they can put in dental implants. Fourth, the gap needs to have sufficient space for the dental implants.

There are several key benefits of dental implants. First, a dental implant serves as a permanent replacement for a missing tooth. As long as the patient cares for it well, it may last for decades. Second, a dental implant will simulate the jaw, which implies that the patient will not have to worry about the jaw being resorbed. Thus, a dental implant may help in maintaining the structure and shape of the face. Third, it will make it easier for the patient to eat and speak, compared to dentures. Thus, patients can enjoy their favorite foods again. Fourth, the patient will simply need to brush and floss the dental implant just like a regular tooth. There is no special cleaning regimen required.

Meanwhile, it is also important to note that Dr. Brannock can also provide cosmetic dentistry services, such as porcelain veneers. These can be used to address cosmetic problems with the teeth, such as stains and small chips and cracks. These may also be used to remedy small gaps between teeth. Porcelain veneers are thin porcelain wafers that are fabricated to fit the shape of the surface of the teeth. They are molded and customized in such a way that they match the surrounding teeth to address the various cosmetic problems. They can also be used to protect the tooth from future harm and damage.

Founded in 2013 when Dr. Richard Brannock took over the practice from the retiring dentist, Mallard Creek Dental offers dental services for the entire family in a friendly and comfortable environment. Dr. Brannock obtained his BS degree from Brigham Young University. Next, he obtained his Doctor of Dental Surgery degree from the University of Texas-School of Dentistry at Houston. He is currently a member of the Academy of General Dentists, Texas Dental Association, and American Dental Association. He also underwent training at the world-famous Dawson Center of Advanced Dental Studies and the Eggleston Implant Institute.

The quality of the services provided by Mallard Creek Dental has been shown to be at five star level because of the five star reviews they have been receiving. They currently have an overall rating of 4.9 out of 5 stars on Google after receiving almost 90 reviews. In a recent review, Steffany Pipkin gave them a five star rating and said, "I love this practice. Dr. Brannock does not disappoint. My family will be lifetime patients."

Those who are interested in learning more about the various dental services provided, such as dental implants and the Mallard Creek Dental porcelain veneers can visit their website or contact them on the phone or through email.
