

Mind Body & Soul Medical Aesthetics & Wellness Adds New Morpheus8 Body Device

September 25, 2023

Pensacola, Florida - September 25, 2023 -

Pensacola, FL ? Mind Body & Soul Medical Aesthetics & Wellness has announced that they have recently purchased a Morpheus8 Body radiofrequency (RF) microneedling device and will now be offering services utilizing the technology. The body piece allows Mind Body & Soul to provide their clients with contouring, skin tightening, scar reduction, pigment evenness, and more across their entire body with more dramatic results.

Morpheus8 delivers the deepest fractional treatments available, and for the stubborn areas like the arms, abdomen, legs, and flanks, the body device targets subcutaneous tissue for top tier body sculpting and contouring. By bringing on Morpheus8 Body services to their practice, the team at Mind Body & Soul Medical continue to reaffirm their commitment to providing world-class care and a plethora of unique services in Pensacola.

"At Mind Body & Soul Medical, we want every single person who walks through our doors to feel empowered and become the healthiest most beautiful version of themselves," said Jaime Conti, RN, and laser technician at the practice. "I am so glad we can further that mission with the best-in-class technology and innovative devices like Morpheus8 for the body."

Conti's hours are accordingly expanding as she gears up to provide more Morpheus8 sessions to patients. The service is already popular as evidenced by the increasing amount of body package treatment sign-ups at the med spa, reaffirming Mind Body & Soul Medical's dedication to device innovation. Radiofrequency microneedling is part of the next generation of skincare device systems, with the Morpheus8 being the sought-after, hallmark platform.

Microneedling in specific is a process where tiny needles repeatedly puncture the skin to create microlesions. This controlled injury triggers the body's natural healing response, increasing the production of collagen and

elastin proteins. These essential proteins are necessary for giving skin its healthy bounce, and when triggered by microinjuries, result in a regenerative effect for firmer and more youthful skin. This is especially useful for anti-aging purposes as the production of such proteins diminishes with time, pollution, nutrition, and other internal and external factors.

Morpheus8 Body takes precise microneedling technology further by using radiofrequency energy. With each puncture of the skin, a burst of energy is transmitted deep within the skin's layers. This furthers the production of collagen and elastin to create a powerful treatment, targeting a range of skin irregularities and concerns like pigmentation, laxity, fine lines, wrinkles, and more. The multimodality usage of the Morpheus8 utilizes the RF side to deeply penetrate and burn away fat cells in hard-to-reach areas, adding to its body sculpting credentials.

"The Morpheus8 Body device is a versatile tool that allows your provider to adjust specific settings in an effort to best achieve your goals of burning fat, tightening skin, and improving skin's tone, texture, and overall quality," continued Conti. "Morpheus8 Body treatments can really reprogram our self-worth, as visual changes create internal changes. We can't wait for our patients to experience it for themselves!"

Mind Body & Soul Medical is open and taking appointments for new and existing patients.

About Mind Body & Soul Medical Aesthetics & Wellness

Mind Body & Soul Medical Aesthetics & Wellness is a medical spa and wellness center that was founded by Marlee Bruno in October 2018. Focused on regenerative medicine, healing, wellness, and aesthetic procedures, they provide high-quality care in a relaxing space. Considered a forerunner in popular aesthetic procedures like PDO threads, their scientifically backed services are provided by skilled practitioners who consistently stay atop of industry trends and technology to bring patients naturally enhanced results. Additionally, they provide tailored care plans with the goal of improving patients' beauty, health, and confidence with a broad range of services.
