Bexley Dental Is Restoring Patient Smiles With Its All On 4 Dental Implants Procedure In Sydney

October 03, 2023

October 03, 2023 -
Bexley Dental, a dental practice in Sydney, NSW, is helping patients learn more about the All On Four dental implant procedure, a natural, comfortable, and functional treatment for full teeth replacement.

The All On Four implant procedure is an advanced technique that allows a full arch of teeth to be supported by only four teeth implants. The procedure has become a popular alternative to dentures due to its speed, minimal invasiveness, and high success rate. It produces beautiful results, giving patients back their smiles and enabling them to face the world with renewed confidence.

Dr. Theo Spyrakis, the founder of Bexley Dental and its resident All On Four and Implant Expert, shares more information about the procedure by saying, ?Dental implants are small titanium screws that fit inside your jawbone to replace the root of a missing tooth. With regular dental implant procedures, to replace a full arch, eight or more implants are required. With All On Four, instead of needing an implant for each of them, they are supported with just four dental implants.?

Conventional full-mouth implants can be limiting as they require implants to be screwed into areas of reduced bone density at the back of the mouth, needing bone grafting and sinus augmentation to strengthen the jaw bone, a significantly more invasive procedure. However, with All On Four, only two implants at the back of the mouth, cleverly angled at 45 degrees, are needed to avoid bone-deficient areas while retaining strength.

The procedure was first researched and perfected by Professor Paulo Malo of the Malo Clinic in Portugal in the 1990s. He brought forth the innovation of adopting a 45-degree angle for posterior implants that eventually led to the evolution of the All On Four implant procedure. Following this success, Dr. Malo soon became a world-renowned expert in advanced oral rehabilitation, passing on his knowledge to others like Dr. Theo Spyrakis, who has spent the last two decades dedicating his expertise to dental implants and full teeth replacements.

The full arch dentistry implant treatment at Bexley Dental comprises three main stages. It begins with an implant assessment where the doctors make a detailed plan of the patient?s personalized treatment to ensure they get the outcome they are hoping for. Next, the treatment itself takes a few short hours and is performed under sedation. Finally, it can take around six months for the bone to fully grow around the implants, during which patients are provided with all the information required for the aftercare.

Dr. Theo Spyrakis and the rest of the team of dentists at Bexley Dental have received tremendous recognition and approval from Sydney locals. The clinic boasts a stellar overall rating of 4.8 out of 5.0 on its Google Business Profile from over 120 reviews with customers praising the clinic?s helpful and responsive customer service, caring and compassionate dentists, and its wide range of dental services including general dentistry, orthodontics, endodontics, and cosmetic dentistry & whitening.

A recent review of the All On Four dental implant procedure at Bexley Dental says, ?Dr. Theo Spyrakis is indeed the King of Smiles! My partner is over the moon with the All-on-4 transformation that has truly changed his life! The entire process from go to whoa was fully explained and painless and the end result was more than we could wish for! They look so natural and Dr Spyrakis and his staff are simply wonderful. Cannot praise them more highly.?

Another patient writes, ?Love love my new smile thanks to Dr Theo and his team. If you have any doubts never fear, my All on 4 is the best investment I?ve ever made. 53 years old and to be told 3 of 8 of my top teeth were loose I freaked! But Dr. Theo was amazing and it was the best decision ever.?

Readers in Sydney, NSW, can contact Bexley Dental at (02) 9567-4151 to learn more about full mouth implants and to book an appointment.
