Sydney Holistic Dental Centre Is Offering Patients The Benefits Of Holistic Dental Implants

October 02, 2023

October 02, 2023 -
Sydney Holistic Dental Centre, a holistic dental provider based in Sydney, is offering patients a long-term solution to replace tooth loss ? holistic dental implants.

Dental implants can be used to replace both single and multiple teeth and can also be used in association with removable dentures to anchor or improve the stability of the dentures. Unlike other options that may be uncomfortable, such as dentures, or affect the natural tooth structure of a patient, such as bridges, dental implants can be both a great functional and cosmetic solution.

At Sydney Holistic Dental Centre, the dentists take a holistic approach to ensuring dental implant treatments work for their patients. This includes looking at the patient?s overall health, getting diagnostic scans that provide a detailed view of the jawbone, and determining whether they are a good fit for the treatment. Some of the advantages of dental implants, such as improvement in appearance, restoration of normal eating and speech, and improved dental retention also help in improving more than just the patient?s dental health.

?While dental implants have a high success rate and longevity,? says the spokesperson for Sydney Holistic

Dental Centre, ?there are certain considerations that need to be made when investigating whether they are right for you. First, we need to determine if you are allergic or hypersensitive to the metal used. Next, if you have a compromised immune system the longevity of the implant can be affected. A thorough medical assessment is therefore needed. Finally, if you lost the tooth or teeth due to tooth infections, the dental implant may not last.?

The dental implant options available at Sydney Holistic Dental Centre include a single-tooth replacement, multiple tooth replacement, and full mouth replacement or full denture support. Full mouth reconstructions can be achieved by placing implants to which fixed bridges are attached or by placing implants that can support removable dentures. The entire process, from start to finish, can take up to 6 months as the implants take time to be integrated into the bone.

Sydney Holistic Dental Centre has earned the love and admiration of patients from the city and nearby suburbs and it is evident in the reviews it has received over the years on its Google Business Profile. In their reviews, patients praise the dental clinic?s helpful and considerate doctors, the responsive staff, and its wide range of dental services.

One patient says, ?I have been to this practice for almost 8 years. Fantastic service! Doctor Teoh has been very professional in addressing my teeth. It makes my jaw aligned now and reduces my grinding. My hygienist Kristel is very experienced with making sure my teeth are clean. As I have super sensitive gums, she has to manually and slowly clean my teeth. You can see that she has all the patience no doubt about it. Overall, I am very satisfied with the addressing my needs.?

Another patient writes, ?I saw Lewis at the practice for my Invisalign, he?s so kind and professional. He did an amazing job for my teeth and I could not recommend him and the practice enough. I also go there for my dental clean and the hygienists are all so warm and kind. The practice is so beautiful looking and the girls at the reception make you feel so welcome as soon as you arrive! I highly recommend.?

The clinic?s services include general dentistry services such as dental hygiene and therapy, children?s dentistry, emergency dental, oral cancer screenings, orthodontic dentistry, composite dental fillings, ceramic restoration, teeth crowns, Zirconia implants, dentures and bridges, dentistry for anxious patients, wisdom tooth removal, and dental splints; holistic dentistry services such as mercury amalgam removal, root canal treatment, snoring and OSA, sleep treatment, headache treatment, and breathing well; cosmetic dentistry services such as Invisalign Clear Braces, Myobraces, teeth whitening, dental implants, and porcelain veneers; and holistic health coaching.
