

Sensational Smiles Dental Offers Dental Implants for Natural Looking Teeth in Sydney

September 28, 2023

September 28, 2023 -

Sensational Smiles Dental, a dental clinic in Kirrawee, Sutherland Shire, Sydney, NSW, Australia, wants to emphasise that they enable patients to restore their natural-looking teeth through dental implants Sydney patients can rely on. While the loss of teeth can result into various problems, such as lower self-esteem and quality of life, dental implants can offer a solution by providing natural-looking teeth. Since the implants look and act like natural teeth, patients can get back their confidence with their natural-looking smile.

Dr. Michael Shehata, founder of Sensational Smiles Dental, says, "One of the most common questions we are asked when it comes to dental implants is their cost. However, it's important to note that every patient's case is unique, and therefore the cost of dental implants varies based on several factors. Generally, the total costs of a dental implant procedure include consultation and diagnostic tests, implant fixture or post-placement, abutment placement, crown placement, and follow-up care."

In Sydney, the average cost of a single dental implant ranges from \$5,500 to \$6,500. The cost may vary depending on a number of factors, including the number of implants needed, the complexity of the case, the type of implant used, and any additional procedures required before or after treatment. Meanwhile, dental implants may appear to be more expensive compared to dentures or bridgework. However, they may actually be more cost-effective over the long run because they will last much longer compared to the other alternatives.

At Sensational Smiles Dental, it has become standard practice to use the latest technology. Some of the latest technology that they are using include 3D smile design technology, digital x-ray technology, and CEREC same-day crowns. 3D smile design technology enables them to produce three-dimensional mock-ups of the patient's future smile after a particular treatment. This allows the patient to see the results of the treatment even before it is completed.

With digital x-ray technology, they are able to provide a more accurate diagnosis. Digital X-rays are also safer compared to conventional CT scanners, enabling a more comfortable patient experience, while also providing the highest degree of precision in the placement of dental implants.

Meanwhile, the CEREC® machine is a system for producing dental crowns at the dental office, thus allowing patients to have the dental crowns in a single visit. With the CEREC machine, there is no need for the patient to get a temporary crown and then return for a second appointment.

Sensational Smiles Dental can also provide All on 4 dental implants, which is a method used for full arch implant restoration. It utilises four titanium metal dental implants: two at the front part of the jawbone and two posteriorly tilted implants for improved support at the back. Once these have been implanted into the jawbone, a bridge is attached to provide the patient with a full set of permanent replacement teeth that are natural-looking and capable of functioning like the original teeth. Dr. Shehata says, "With All on 4, you can kiss goodbye to inconvenient and poorly fitted dentures. We often see patients with dentures at our Sydney clinic in Sutherland Shire, looking for a more permanent solution for their teeth replacement. They want an affordable teeth replacement solution that fixes their problem so they can eat comfortably without worrying their dentures will slip out of place. The All on 4 technique is the ideal solution for patients who do not want to compromise their lifestyle due to missing teeth."

Established in 2010 by Dr. Michael Shehata, Sensational Smiles Dental is a dental clinic in Sydney's Sutherland Shire that offers a full range of general, orthodontic, implant, preventive, pediatric, and cosmetic dental services. Dr. Michael Shehata graduated from Griffith University in Queensland, ranked second in his cohort, and became a member of the Golden Key Club for Academic Excellence. He was an associate dentist for many years before establishing Sensational Smiles. He is trained in implant dentistry, orthodontics, cosmetic dentistry, and bite reconstruction. He has recently completed an intensive international orthodontic program and emerged from the program with first-class honours.

Those who are looking for an implant dentist can check out the Sensational Smiles Dental website or contact them on the phone or through email.
