

Volkswagen Dealership Launches Express Service For Local Drivers

October 27, 2023

October 27, 2023 - PRESSADVANTAGE -

West Edmonton Volkswagen, based in Alberta, is offering drivers access to the region's first Volkswagen Express Service Center. The service centre was designed from the ground up to streamline vehicle intake and servicing, enabling customers to enjoy the benefit of a maintenance routine that respects their schedule. Schedule a service here to get started: <https://www.westedmontonvw.com/schedule-service/>.

The dealership acknowledges that certain services, such as more extensive repairs, will by their nature require more time to deal with. However, many services take very little time to implement, and the dealership believes it is not reasonable to expect customers to spend their valuable time waiting in a queue if all they need is a simple tune-up.

"We don't believe routine maintenance should take all day," states a representative from West Edmonton Volkswagen, "so when we were designing the building, we took care to design bays for express services so when you come in for an oil change you can get back on the road quickly." This benefits other customers as well, given that they no longer have to wait behind a long line of drivers who have arrived for minor services.

The representative adds, "If you do need to stop in for larger services, we have over 40 bays and a team of expert technicians, including Master Technicians and EV-certified technicians." Master Technicians are always on duty, so the presence of a knowledgeable and experienced team further serves to minimise how long drivers have to wait while their vehicle undergoes essential repairs and so on. With problems being identified sooner and fewer errors being made during service, wait times can be reduced to the absolute minimum required. See more here: <https://www.westedmontonvw.com/>.

West Edmonton Volkswagen additionally provides a number of conveniences and amenities that elevate the experience of every car owner who gets their Volkswagen serviced in Edmonton. Should a car need to be deposited with the team for an extended period, for instance, the dealership invites customers to make use of their courtesy vehicles for the duration of the service. The dealership also utilises cutting-edge diagnostic equipment (and the extensive experience of a dedicated team) to generate a health report for each vehicle with every service. This report is made available to the customer for free.

Car owners are also welcome to explore their trade-in options during a visit to the dealership. West Edmonton Volkswagen offers excellent trade value for a range of vehicles, and customers may find that an upgrade is further within reach than they expected if they opt to trade. The guaranteed trade value of any vehicle can be checked online as well.

Alternatively, customers may prefer to apply for financing if they are pushing for nothing less than their dream vehicle. West Edmonton Volkswagen offers both new and pre-owned vehicles to all their customers, including a selection of the manufacturer's world-famous EVs.

A recent review from Grace K. identifies West Edmonton Volkswagen as a "Clean and attractive showroom with the best service! Russ (Product Advisor) jumped right in from my first visit to help me out. He's very friendly and knowledgeable. I've only ever had a family vehicle, so this was my first official big purchase, my anxiety was at an all-time high. Russ went through things at my pace and answered every question to make this a wonderful experience."

The review continues, "Once my budget was identified, Russ and John (General Sales Manager) enthusiastically catered to my needs and wants, and I found the perfect car for me! Then, Catherine (Business Manager) got into work to get me the financing, which was surprisingly an easy-breezy process. Of course, she's a great conversationalist, so it made it all the more enjoyable. 100% recommended for great service and large inventory." See more here: <https://www.westedmontonvw.com/coupons/>.

West Edmonton Volkswagen looks forward to working with car owners who arrive for any kind of service

imaginable. All are welcome to make use of the dealership's service centre and its advanced capabilities.
