Morningside Plumbing Debunks Common Myths About Drain Cleaning and Provides Expert Advice

October 19, 2023

Atlanta, Georgia - October 19, 2023 -
Morningside Plumbing, a leading Atlanta-based plumbing company, aims to bust common myths about drain cleaning and educate homeowners on the importance of professional drain cleaning services. The company has built a strong reputation as a reliable and knowledgeable Atlanta plumber specializing in drain and sewer cleaning.

According to Morningside Plumbing, many homeowners rely on quick fixes for a blocked drain, potentially worsening the underlying issue and resulting in more expensive repairs. The company stresses the importance of calling experts for advice on drain-related issues.

A quick search online reveals numerous myths and misconceptions about drain cleaning that homeowners should be aware of to avoid costly repairs. One such myth is that all drains work the same way. Morningside Plumbing asserts that this is not the case and that different drains have different functions and require specific cleaning techniques.

The company also advises against using store-bought chemicals to fix a clogged drain. These can often do

more harm than good, damaging pipes and exacerbating the problem. Another prevalent myth is that all plumbers specialize in drain cleaning services. While drain cleaning is a standard service, some plumbers, like Morningside Plumbing, specialize in this area and utilize advanced techniques and equipment to fix issues more effectively.

Many homeowners fear that any plumbing issue will be expensive, but Morningside Plumbing assures them that this is not necessarily true. In the hands of a professional, a clogged drain can be an uncomplicated and inexpensive issue to resolve.

The company also addresses the misconception that drain snakes are the most effective tool to clear clogs. While they can locate a clog, there are sometimes better solutions for clearing it, which is another reason to rely on expert services.

Paul Wimpey, owner of Morningside Plumbing, dispels a widespread plumbing myth that a lot of people appear to believe. ?Do not think that plumbing issues, such as slow-flowing drains, will resolve themselves. They will not. On the contrary,? Wimpey continues, ?drain problems cannot improve without intervention.?

Professional intervention from professionals like Morningside Plumbing ensure drains are clean and can reduce the chances of future blockages. For more information or to schedule a consultation, contact Morningside Plumbing using the contact details below.
