Peppy Heating and Cooling Is Helping Customers Qualify For Inflation Reduction Act HVAC Tax Rebates

December 12, 2023

Boise, Idaho - December 12, 2023 -
Boise, ID, HVAC contractor Peppy Heating and Cooling is urging local homeowners to take advantage of the Inflation Reduction Act HVAC tax credits that they may be eligible for.

Introduced as a part of the Inflation Reduction Act of 2022, the tax credits are designed to make high-efficiency technologies such as heat pumps and ductless heat pumps more affordable for Americans. The intent behind the tax credits is to compel American homeowners to upgrade their homes with high-efficiency equipment which will hopefully lead to better utilization of the energy produced in the country at a national level. Apart from saving huge amounts of energy, the tax credits are also expected to reduce Americans? carbon footprints as they move to environmentally friendly options.

?The tax rebate,? says Brett Shannon, the president of Peppy Heating and Cooling, ?is applicable for homeowners and business owners who upgrade to a modern high-efficiency heat pump or ductless mini split heat pump. These devices are far more advanced than they were two decades ago and have undergone a dramatic increase in their technology. Not only do they save energy but they also save you a large sum of money in the form of reduced utility bills. If your current home heating and cooling system is nearing its end of life, it is a no-brainer to switch to their modern equivalents right now while the tax credits are still applicable.?

The tax credits were put forth on January 1, 2023, and are applicable to qualifying heating and cooling products such as high-efficiency furnaces, high-efficiency air conditioners, and high-efficiency heat pumps as well as energy-efficient windows and water heaters. American Standard has several products that are ENERGY STAR-rated and meet the requirements of the IRA. Mitsubishi also makes qualifying mini split heat pumps that provide ultra-high energy ratings and are flexible in design.

?With Mitsubishi mini splits,? says Brett, ?you have the perfect solution for solving the problem of hot and cold spots in your home, increasing home comfort, and improving indoor air quality (IAQ). We can help you

set up both ducted and ductless heat pumps from Mitsubishi to leverage the tax rebates. In fact, Peppy Heating and Cooling is the only Mitsubishi Elite Diamond Contractor in Boise. Visit our website to find out more about all our industry credentials which are some of the highest that a contractor can have in the HVAC industry.?

The Boise HVAC contractor has time and time again been praised by its customers for delivering quality workmanship with helpful and responsive customer service. The company even boasts a perfect overall rating of 5.0 out of 5.0 on its Google Business Profile from nearly 500 reviews. In their testimonials, customers also thank the company for the professionalism of its crew members, the wide array of HVAC services offered, and the competitive pricing.

In a recent review, a customer shared how Peppy Heating and Cooling helped them qualify for the rebates. The reviewer says, ?I had a couple of heat pump units installed in one of my properties and I was very impressed with the communication and customer service at Peppy. They do great work and they actually ended up costing me less than other options that I looked at. They helped fill out a rebate application so I was able to get hundreds of dollars back for my heat pump installation. Overall, I would highly recommend this company and will definitely use them again for my heating and cooling needs.?

Brett urges readers to verify if they qualify for the IRA tax rebates by saying, ?If the tax rebates sound like something you want to take advantage of and are wondering if you qualify, we can help! Call us to schedule a free consultation with our tried-and-true HVAC techs who know exactly what is needed to qualify.?
