

# Bowcutt Dental Cedar Park Offers Dental Implants Service in Cedar Park Texas

*October 09, 2023*

October 09, 2023 - PRESSADVANTAGE -

Bowcutt Dental Cedar Park, a dental practice based in Cedar Park, TX, is offering a dental implants service in Cedar Park and surrounding areas. One of the important achievements of modern dental technology is the use of dental implants as replacement for missing teeth. While the process usually takes a lot of time to complete, the final result is a replacement for missing teeth that is very much like having new natural tooth. A dental implant is made up of a metal rod, which is usually made from titanium, that is implanted into the jawbone of the patient. After a number of months, this metal rod fuses to the bone tissue and this serves as the artificial root of the replacement tooth. After the implant has fused with the jawbone, Dr. Bowcutt will affix a porcelain crown.

Dr. Bowcutt says, "Dental implants are, without a doubt, a great choice for some people. But they may not be right for every patient. In order to accommodate an implant, you'll need to have sufficient bone tissue present in your jaw. If your jawbone is compromised in any way - as may be the case for patients suffering from advanced gum disease, for example - a dental implant may not work for you. I'm inviting those who are interested to book a consultation with us to find out if they are a good candidate for an implant."

There are various advantages offered by dental implants. First of all, dental implants appear and function like natural teeth. They are permanent restorations and can't be removed, unlike dentures. Even if the tooth root and crown are artificial they look and feel like a natural tooth.

Second, the implants can help to preserve the bone tissue in the jawbone. This is because the jawbone starts to deteriorate if the tooth root has been missing for a long time. The implant stimulates the bone tissue to grow, thus providing a stronger jawbone, which retains the attractive facial structure of the patient.

Third, dental implants can boost the patient's self-esteem and self-confidence. This is because having an attractive smile can make the person feel better about their appearance. In addition, the patient would feel

fully comfortable and confident while talking, eating, laughing, and doing other regular activities.

Fourth, unlike dentures and bridges, dental implants don't impose a restriction on the patient's diet choices. The reason for this is that implants don't slip and slide like dentures. They remain in place and function just like natural teeth, allowing the patient to eat whatever food they like.

Fifth, it is easy to take care of the dental implants. The patient can take care of them in the same way as they care for natural teeth, i.e. to simply brush and floss them every day. Furthermore, there is no need for messy adhesives that are often needed to keep dentures in place.

Sixth, dental implants don't cause irritation of gum issue or the other teeth. Bridges and partial dentures typically have metal clasps to hold them in place. These clasps do not just exert unwanted pressure on teeth but they can also irritate gum issue.

Seventh, dental implants are durable and long-lasting. In fact, as long as they are cared for properly, they usually last for the lifetime of the patient. Eighth, implants can enhance the patient's health because they can reduce the risks of gum disease. Lastly, implants are relatively affordable. While the initial cost is high, they are actually less costly in the long run because they don't require maintenance unlike dentures and bridges.

Bowcutt Dental Cedar Park is owned and headed by Dr. Kevin Bowcutt. He says, "It has always been a dream of mine to own a dental practice where quality dentistry and patient care is the focus! I enjoy forming lasting relationships and hope you feel more like family than a patient. I take great pride in the quality of care we provide from everyday cleanings to implants, Invisalign, and dental veneers. I look forward to welcoming you to our Cedar Park dental office."

Those who are interested in the dental implants service offered by the Bowcutt Dental Cedar Park cosmetic dentist can check out their website or contact them on the phone or through email. They are open from 8:00 am to 5:00 pm on Mondays and Wednesdays; and from 7:00 am to 3:00 pm on Tuesdays and Thursdays.
