

Simply Clever Cards Releases Multiplication Flash Cards That Are Useful for Sharpening Arithmetic Skills During the Holidays

December 16, 2015

December 16, 2015 -
Saratoga, FL - Simply Clever Cards have released a set of arithmetic cards on the number one online shopping portal, Amazon. According to the company, these flash cards can serve as a learning adjunct during the holiday season. The multiplication flash cards provide an adequate resource that allows for learning at home. Parents can utilize the cards to assist children to attain a better appreciation of arithmetic.

The multiplication flash cards are a versatile set that can help children improve their comprehension and knowledge of numbers and arithmetic. According to the company, the multiplication flash cards are also suited to increase cognition. This is because the flash cards can impart concepts to users in an engaging manner. The company highlighted that the arithmetic flash cards were a great method to acquire better critical thinking and problem solving skills. The flash cards improve the user?s decision making and social interaction skills. The holiday season can be filled with both fun and an educational environment.

According to Simply Clever Cards, these multiplication flash cards can increase understanding of the common core concepts in mathematics. Children will find this an interactive gift for the holidays. Parents can

decide to give this deck of cards instead of the usual electronic gifts such as cell phones, tablets and gaming consoles. The flash cards can allow for hours of fun without the need for electrical power. It is also more advantageous than electronics because it imparts knowledge in addition, subtraction, multiplication and division.

The deck of cards contains a miniature guide printed on the jokers that shows different methods to use them. Users can play traditional card games, which is not usually possible with other regular flash cards. These games include War, Memory, Go Fish, Crazy Eights, UNO, and Old Maid. All of these games can then be turned into math games that sharpen the arithmetic skills as outlined in the manual.

The holiday season is usually one filled with fun, relaxation and a laid back attitude. The usage of the multiplication flash cards can provide much fun, but also serve as a tool to enhance educational skills. The attainment of knowledge in arithmetic is not only limited to learning numbers, but also allows for a better understanding of fractions.

One satisfied customer, Sara, remarked that the multiplication flash cards offer, ?a different approach that can take some getting used to. You utilize the cards to play games that your child is already familiar with, or create games out of the card by having your child look for patterns and familiar aspects. That way your child is focusing on what the numbers have in common and how to get the correct answers rather than just memorizing and repeating information.?

Customers who purchase 3 decks of arithmetic flash cards can get 6% off their order total by entering the code SCC03G06 at checkout.
