

Children Can Receive a Gift To Improve Their Mathematics Skills This Christmas With The Multiplication Flash Cards From Simply Clever Cards

December 19, 2015

December 19, 2015 -
Saratoga, FL - Simply Clever Cards has designed a unique set of arithmetic flash cards for use by children. The flash cards are a new educational tool for allowing children to improve their understanding and skills in mathematics. This Christmas, parents can buy a gift that will allow the challenging subject of mathematics to be learned by playing regular games and activities.

The multiplication flash cards contain a manual which has details on various games that children can play. The cards also come with an ebook that allows users to better understand how to use them. Additionally, these flash cards can play a traditional set of mathematics games that is interactive for the user. According to the company children can play normal games including Crazy Eights, Go Fish, Old Maid, Memory, War and UNO.

The arithmetic flash cards can offer a different method to keep children preoccupied during the Christmas season. This way is easy, fun and doesn?t include the use of technology. Most times children spend their free time during Christmas using electronic devices such as tablets, game consoles, iPads and cell phones.

According to Simply Clever Cards, the multiplication flash cards engage children better than these handheld devices. Another benefit is that they don?t require power, so the user doesn?t have to worry about batteries running out.

The multiplication flash cards allow children that use it to increase their knowledge of basic mathematical principles. This Christmas, parents can provide a gift that is not only interactive and fun but also educational. The flash cards can assist in the learning of addition, subtraction, multiplication and division. Additionally, the use of the cards can allow for children to learn the use of fractions.

One satisfied customer commented, ?These are a really great teaching tool for us as a homeschooling family. You can actually use these as regular cards or as math cards. Math is my kid's favorite subject and so these cards fit right into their interests and they were super excited to receive them. The instruction book inside isn't very clear but I did receive an email with more instructions? I can see that we will be using these for a long time to come.?

The multiplication flash cards are available for customers on the giant shopping portal Amazon.

Customers who buy four decks of the product can get 7% off their order total by entering the code SCC04G07 at checkout.
