

Multiplication Flash Cards Turn Free Time During The Christmas Period Into Engaging Learning Experiences

December 22, 2015

December 22, 2015 -

Saratoga, FL - Simply Clever Cards has manufactured a deck of cards that can become engaging resources during the Christmas season. These multiplication flash cards are made to satisfy a fun and educational time for children. The company highlighted it can become a gift for children 7 years and older. The cards are useful for learning common core concepts in arithmetic for children in kindergarten and primary school aged kids.

The multiplication flash cards can be used to entertain children during the holidays. The cards are a better idea than handheld devices to keep children preoccupied. The usual devices children tend to utilize nowadays include cell phones, game consoles, iPads and tablets. These however require power and to constantly recharge batteries. The deck of cards provide an option for gaming that children can have fun with for long periods during the Christmas period, without having to keep charging the batteries all the time

According to the company, the additional benefit of the multiplication flash cards is that they are a learning

tool for children. That means while the cards are being used to play games then they can also teach children mathematics skills. The cards are useful to make children learn addition, subtraction, multiplication and division. The multiplication flash cards can give children a good learning of fractions.

Outside the classroom, the multiplication flash cards provide another way to engage children. It does this in a unique method by combining the learning of common mathematical skills with innovative games. The company highlighted that this method enhanced the problem solving and critical thinking skills of the user. When children utilize the flash cards they also increase their social interaction skills as they play games with other persons. The cards also reinforce decision making skills as it causes children playing with them to find accurate ideas about numbers in engaging ways.

One satisfied customer Donna Schmitt commented, ?I ordered these for my grandson, I didn't want him struggling the way both I and his mother did with simple math. These are so much more engaging than flash cards, and teaches basic skills that the calculator and computers rob kids of knowing. Wish these were available years ago.?

Customers can purchase the multiplication flash cards exclusively on the giant online shopping portal, Amazon. The purchaser can access free shipping if four or more card decks are bought.
