A recent review says, "I interacted with three ladies who were all exceptionally kind and pleasant. I waited five hours for a callback from my primary care provider today. After four and a half hours I went to Amana. Within half an hour I was checked in, had my vitals done, and was waiting for my first test result when I got the callback. I was happy to tell her that I was already taken care of because that's how I felt. I truly appreciate what a wonderful experience I had today."

Another patient shares their experience by saying, "This was my first time using Amana Care. I was incredibly impressed and will be going here in the future. First, we scheduled the appointment online and my son's appointment was at the exact time that they predicted. Second, the nurse was very friendly, the doctor came in immediately after the nurse left, and the X-ray tech was ready when the doctor was done checking him. After the X-rays, the tech gave him a popsicle and turned on the TV for him. Our entire experience was fast, kind, and professional. I will be recommending this walk-in clinic to my friends and family!"
