

Lice Charmers Clackamas Introduces Pioneering 3-Pronged Treatment Method

October 17, 2023

PORTLAND, OR - October 17, 2023 -

In a landmark move to transform the battle against head lice, Lice Charmers in Clackamas County Oregon has launched its cutting-edge 3-pronged lice treatment method. Merging the efficacy of heat application, combing, and a novel hypoallergenic oil, this comprehensive approach promises a revolution in lice eradication.

Lice infestations have long been a pressing concern, particularly among school-age children and their families. The itching, discomfort, and social stigma surrounding lice make finding a reliable solution imperative. Lice Charmers Clackamas' latest offering not only promises immediate relief but also emphasizes safety and preventive measures.

The treatment's first phase involves the precise application of controlled heat. Groundbreaking research demonstrates that both lice and their eggs, known as nits, are highly susceptible to certain temperatures. Leveraging this knowledge, Lice Charmers Clackamas' equipment meticulously delivers the required heat, exterminating the lice and nits without any discomfort to the individual.

After the heat application, the second phase comes into play. This entails a thorough combing process conducted by Lice Charmers Clackamas' expertly trained technicians. Using industry-leading combs, they ensure that every strand of hair is inspected and cleared of any lingering pests. The key to any successful lice treatment is the complete elimination of any nits that are within a quarter inch of the scalp and all live head lice. Without this, the infestation can continue for weeks or even months in some cases. Many pesticide based head lice treatments only treat the live bugs or only some of the eggs. This is ultimately futile as the head lice will continue to reproduce and continue the infestation while spreading to others in the infested person's close social circle.

Completing the trio of treatment components is a specially developed hypoallergenic oil. This unique formula

not only soothes the scalp after treatment but also acts as a deterrent against potential reinfestations. Furthermore, the oil imparts a conditioning effect, leaving the hair healthier and more robust than before.

Alexis, Co-owner of Lice Charmers Clackamas, commented on this breakthrough, stating, "Our main goal has always been twofold: effectiveness and safety. With this 3-pronged method, we're elevating the standards of lice treatment. By integrating heat, combing, and our specially developed oil, we're ensuring a comprehensive solution that's not only potent but also gentle on the scalp."

Given the prevalence of lice infestations, particularly in educational settings, such an innovative solution has been eagerly awaited. Schools and other institutions stand to benefit immensely, reducing the frequency of outbreaks and ensuring a more comfortable environment for students.

The initial response to this treatment has been overwhelmingly positive. Parents have lauded its thoroughness and the peace of mind it brings, knowing that their children are not just free from lice, but also better protected against future infestations. One thing that separates Lice Charmers lice clinic from competitors is that the guarantee covers not just treatment failure or operator error, but also reinfestation from any source. If an active lice infestation is found within the guarantee period, then Lice Charmers will re-check and re-treat everyone from the original appointment for free.

Lice Charmers lice treatment in Clackamas, with this new method, further cements its position as an industry leader. Its unwavering focus on research and commitment to clients' well-being ensures that it remains at the cutting edge of lice treatment solutions.
