November 09, 2023 - PRESSADVANTAGE -

Jackson, Wyoming - Center for Aesthetics, Jackson's premier destination for cutting-edge medical aesthetic skincare, is thrilled to introduce Clear + Brilliant laser resurfacing, a revolutionary non-invasive solution to unlock youthful, glowing skin. Under the guidance of Dr. Catherine Durboraw, the Center for Aesthetics proudly brings this transformative treatment to the Jackson Hole area.

## Understanding Clear + Brilliant Laser Resurfacing

Clear + Brilliant, recognized as a state-of-the-art laser technology, is meticulously designed to rejuvenate and refresh the skin. This innovative treatment addresses a range of skin concerns, including fine lines, uneven texture, pigmentation irregularities, and the visible signs of aging. Clear + Brilliant accomplishes this by harnessing advanced fractional laser technology, which, as Dr. Durboraw explains, "stimulates the body's natural collagen production, revealing smoother, more youthful skin over time."

## The Science Behind Clear + Brilliant

At the heart of Clear + Brilliant's efficacy is its fractional laser technology. This remarkable technology generates minuscule treatment zones on the skin, encouraging the growth of fresh, healthy tissue to replace damaged cells. Expectations: an impressive enhancement in skin tone, texture, and overall radiance. As Dr. Durboraw points out, "The process is gentle yet impactful, making it an ideal choice for individuals seeking noticeable results without extended downtime."

## Benefits of Clear + Brilliant

Clear + Brilliant offers a range of benefits that appeal to those who aspire to regain their skin's youthful vitality: Youthful Glow: Clear + Brilliant enhances the skin's natural radiance, making it an ideal option for individuals desiring a youthful glow.

Minimized Pores: This treatment effectively reduces the appearance of enlarged pores, resulting in a smoother skin texture.

Improved Texture: Say farewell to rough skin and embrace a smoother, more refined complexion with Clear + Brilliant.

Reduced Fine Lines and Wrinkles: By stimulating collagen production, Clear + Brilliant can reduce the appearance of fine lines and wrinkles, restoring a more youthful look.

### Top Frequently Asked Questions about Clear + Brilliant Laser Resurfacing

In anticipation of inquiries from individuals interested in this remarkable treatment, Dr. Durboraw has provided answers to the top frequently asked questions:

#### Clear + Brilliant laser resurfacing, and how it works

Dr. Durboraw explains, "Clear + Brilliant laser resurfacing is a non-invasive cosmetic treatment utilizing fractional laser technology to target and improve various skin concerns, including fine lines, uneven texture, and pigmentation irregularities. The laser creates microscopic treatment zones on the skin, stimulating the body's natural healing response and encouraging the growth of new, healthy tissue. This leads to a refreshed complexion with improved tone, texture, and radiance."

#### Clear + Brilliant treatment session

"During a Clear + Brilliant session," Dr. Durboraw clarifies, "their skin will be cleansed, and a topical numbing cream may be applied for comfort. The laser handpiece is then gently moved across the treatment area, delivering controlled laser energy to the skin. Patients often describe a sensation of heat or slight prickling during the procedure. The treatment typically takes around 20 to 30 minutes, making it convenient for those with busy schedules."

#### Clear + Brilliant laser resurfacing downtime

Dr. Durboraw reassures patients that "one of the advantages of Clear + Brilliant is minimal downtime. Most patients experience mild redness and a sensation similar to a sunburn immediately after the procedure, typically subsiding within a few hours to a day. Some patients may also notice slight swelling or a sandpaper-like texture to the skin, which usually resolves within a few days. Makeup can typically be applied the next day, allowing the patient to resume daily activities with minimal disruption."

Clear + Brilliant recommended numbers of sessions for results

"The number of recommended Clear + Brilliant sessions may vary depending on individual skin concerns and goals," says Dr. Durboraw. "However, many patients achieve noticeable results after a series of 3 to 6 treatments, spaced about 4 to 6 weeks apart. Initial improvements may become visible shortly after the first session, with optimal results becoming more apparent over the following weeks as the skin's natural collagen production is stimulated."

The new CFA Beauty Jackson blog post offers additional information.
