Tasmania's Innova Dental Is Sharing The Benefits Of The All On 4 Full Mouth Dental Implants Procedure

October 31, 2023

Launceston, Tasmania - October 31, 2023 -
Innova Dental, a dental practice based in Tasmania, is helping local patients understand and benefit from the All On 4 full mouth implants dental procedure.

The All On 4 procedure is more versatile than conventional implant techniques as it enables a full arch of teeth to be supported on just four or six implants. The technique offers the same benefits as conventional implants while being quicker, less invasive, and better suited for most patients. It has been deemed revolutionary for those needing to replace a whole arch of teeth, which requires eight or more implants with traditional methods.

?At its core,? says Dr. Bing from Innova Dental, ?the basic concept of the All On 4 procedure is similar to that of conventional dental implants as the root of the missing tooth is replaced with a titanium screw that is surgically placed in the jawbone. Over time, the bone fuses with the implant to create a solid foundation on which a crown can be placed. However, for All On 4, the innovation comes from the unique angle of the implants, enabling them to avoid bone-deficient areas and gain maximum strength.?

The benefits of the All On 4 procedure are manifold. With fewer implants, dentists have much more flexibility with the positioning of the full arch implants and can design treatments to deliver the optimum fit for replacement teeth. Next, by avoiding bone-deficient areas, the full arch treatment eschews the need for preliminary procedures such as bone grafting. Finally, it is quicker as the replacement teeth can be fitted immediately instead of having to wait for months for them to fuse with the jawbone.

At Innova Dental, Dr. Bing has set up a three-stage process for patients looking to get the All On 4 procedure. It begins with an initial consultation where Dr. Bing will review the patient?s oral and general health and take into account any medical conditions that may impact treatment. The doctors will also take 3D X-rays using advanced imaging technology to gain a complete picture of the patient?s mouth and jawbone. Next, a

detailed treatment plan is put together based on the consultation, scans, and images for the best possible results.

When it comes time to have the implants placed, Innova Dental prioritizes safety. Patients are offered anesthesia to ensure they are as comfortable as possible and pain-free during the procedure. The procedure takes a few hours after which the doctor will be able to fit the replacement teeth onto the implants. Finally, the dentists will discuss the aftercare precautions with the patient. It will take up to six months for the jawbone to fully fuse with the implants.

When asked why patients should choose Innova Dental for their All On 4 dental implant procedure, Dr. Bing says, ?The expertise and experience of the dentist are fundamental to the success of your treatment. At Innova Dental, we are committed to implant dentistry, have advanced knowledge in full arch treatment, and use only the highest quality materials, techniques, and technology. We operate from a purpose-built practice designed to be welcoming and comfortable while enabling us to deliver advanced treatments with ease.?

Innova Dental has earned the love and admiration of the patients it serves in Launceston and nearby areas. The Tasmania dental practice also boasts a near-perfect overall rating of 4.9 out of 5.0 on its Google Business Profile from over 560 reviews. Patients thank Dr. Bing and his team for their knowledge and experience in all dental procedures, their helpful and relevant guidance, and their responsive customer service.

A recent review says, ?My experience with Innova was the best it could possibly be. I was put at ease in every way and the work was completed within the time they said. They were kind, thoughtful, and very professional. For anyone who is apprehensive about the dentist, I cannot recommend this practice more highly.?
