New Braunfels, TX - November 01, 2023 - PRESSADVANTAGE -

Dr. Mark Hickman and the team at Microsurgical Vasectomy Reversals have set themselves firmly on a mission to help fathers to become dads once more. The clinic offers a single service: professional, effective vasectomy reversals. They consider it their duty to help men reverse a vasectomy and pursue fatherhood again.

According to the clinic, it is not uncommon for people to assume that vasectomies are permanent and irreversible procedures. This may largely be due to the marketing and online conversations surrounding vasectomies, and this has the unfortunate effect of convincing men that they cannot become fathers following a vasectomy. Fortunately, Dr. Hickman says, the truth is that vasectomies can be reversed, especially with the aid of an experienced surgeon.

Dr. Hickman is a highly skilled microsurgical surgeon who has set his entire practice's focus on successfully reversing vasectomies. Every action he and his clinic have taken over the course of his nearly 30-year career has been to further the goal of helping men regain their ability to father children. In fact, his work has played a massive role in helping countless parents welcome babies into the world ? even if the father once underwent

a vasectomy.

Microsurgical Vasectomy Reversals makes it as straightforward as possible for men to seek a vasectomy reversal. To begin with, the clinic offers only two options, both of which are all-inclusive in nature. The chief difference between the two options has to do with which type of anesthesia the patient prefers (which has an impact on the price). The microsurgical vasectomy reversal cost option of \$3,300 includes local anesthesia and an oral sedative. Meanwhile, the \$4,200 offer is performed under IV sedation and is administered by a Board Certified Anesthesiologist.

Whichever options a patient chooses, they can rest assured that no additional fees will be implemented at any point. Patients may sometimes present with complications during surgery, for instance, that would require Dr. Hickman to utilize other techniques in order to proceed. Instead of charging the patient further, he will simply resolve the matter and continue.

The simplicity of this approach has made it easier for many couples to add more members to their family. Dr. Hickman and his team are immensely proud of the work they do, and they have long earned the support of the community as a result.

Amande E. says, "Dr. Hickman was personable, funny, and explained everything thoroughly. He followed up with us in the morning to make sure everything was going well. The cost was reasonable, the office was clean and the staff were friendly and supportive. Although the procedure wasn't the most pleasant for my partner, it was bearable, and he does not typically do well with pain. It was done just a couple of days ago, so I can't give any further updates yet, but I will be updating with any news as soon as I have any to report!?"

In a separate review, Allison C. offers a look at the results that can be enjoyed some time following a vasectomy reversal. The review says, "Success! Dr. Hickman and his staff were great from the first initial communication. They answered all of our questions, they were honest and very open. We booked my husband's procedure at our convenience. His vasectomy was 14 years prior, so our hopes were not high. We did not rush to get in, we just kind of said "if it happens it happens" and took our time. Dr. Hickman and his staff prayed over my husband before starting his procedure and talked us through it all. His reversal was in September, and I came up pregnant in December. Baby Crabbs so far is healthy and on track to make their arrival in August!?"

Dr. Mark Hickman recommends that families reach out to vasectomy reversal ministries if they wish to have children again following a vasectomy. The resources provided here may help them understand what is possible through vasectomy reversal procedures. Microsurgical Vasectomy Reversals can also offer

discounted hotel rates to patients who are traveling to see Dr. Hickman.
