Southeast Softwash Launches The Worlds First Remote Blend Manifold - The Smart Blend Pro

November 01, 2023

November 01, 2023 -
Southeast Softwash, the largest turn-key pressure washing equipment provider in the world, has announced the release of the world?s first remote blend manifold for soft wash systems.

The Soft Blend Pro Remote Manifold is a revolutionary, patent-pending solution for pressure washers to remotely control their bleach and surfactant additive valves. With a range of up to 325 feet, the product is a huge game changer as it saves up to 2 miles of walking per workday. It is the only remote metering system of its kind on the market.

?True metering capability at the touch of a button,? says Coty Yarbrough, the owner of Southeast Softwash. ?That is what we have achieved with the launch of the Smart Blend Pro Remote Manifold. There are many imitation setups out there that are merely ON/OFF. Don?t be fooled by them as they don?t let you adjust ratios remotely. For true professional exterior cleaning companies, the Smart Blend Pro is the only way to go.?

The Smart Blend Pro is a 2.4GHz RF system that has a programmed logic board to achieve desired ratios for both bleach and surfactant lines. The SmartBlend technology is compatible with any soft-wash system with the one available to be purchased on the store being built for a 5 to 7 GPM capability.

For those running a 12-volt, air diaphragm, or booster pump in the 5 to 7 GPM range, the Smart Blend Pro will work with their setup. Those utilizing a system with a higher flow (24-volt, gas-powered) will need a high-flow SmartBlend. The Smart Blend Pro Remote Manifold can be purchased for $1,988 or with 4 interest-free payments of $499.50 with AfterPay.

Coty talks about the company?s mission to deliver high-quality pressure-washing products by saying, ?I started this business way before softwashing was even used as a term to describe the industry. Since then,

we have seen softwashing systems evolve and have even played a pivotal role in creating innovative equipment that pushes the technology forward. Ever since we began manufacturing our own equipment in 2018, we have always strived to create the highest quality tools, parts, chemicals, and training to help our customers succeed in their softwashing ventures.?

Southeast Softwash has more than lived up to the expectations of business owners who rely on its equipment for delivering top-notch pressure washing and soft-washing services across the nation. The company boasts a near-perfect overall rating of 4.9 out of 5.0 on its Google Business Profile from over 570 reviews with customers noting the ease of use and robustness of its products, the detailed training resources provided, and the staff?s helpful customer service.

A recent review says, ?I recently did a training course with Southeast Softwash (very informative and excellent deliverance by Coty himself), purchased equipment and chemicals (top notch and worth every penny). Southeast Softwash has the best customer service, business offering, and overall best employees hands down. For the industry, you will not find a better company for all your needs. BATCH BUSTER VALVES ARE THE ABSOLUTE BEST!!!? More information about the batch buster valves can be found at - soft wash metering valve.

Another customer writes, ?What an incredible trip so far!!! We have been so excited for months to see our new trailer and get the opportunity to meet the Southeast Softwash Team. Our day was incredible. We got to meet the team, take the Softwash 101 training class, have hands-on time with our trailer, and have an open Q&A. The value of this day to both of us is priceless. We are thrilled to get to come back home and take care of our community and their homes. To say that this trip was worth it is an understatement. Thank you Southeast Softwash for being the elite company in our industry and constantly looking at ways to innovate.?
