

Quiet Bounce Silent Basketball Gaining in Popularity

November 06, 2023

November 06, 2023 - PRESSADVANTAGE -

Quiet Bounce, a company based in Houston, TX, is happy to announce that their silent basketball, the QBounce, has been riding a popular wave because kids are able to dribble and practice and train in their homes and apartments without disturbing family members and the neighbors. This quiet basketball feels just like the real basketball but it doesn't produce those unwanted loud sounds when it is dribbled. This allows kids to practice anytime and anywhere, including indoors where dribbling as basketball would usually be forbidden because of the loud noises the basketball produces while being dribbled.

The Quiet Bounce? Silent Basketball 2.0 - Indoor Basketball has been receiving a significant number of five star reviews from customers and is becoming more and more popular. A spokesperson for Quiet Bounce says, "The QBounce is trusted by more than 30,000 ballers around the world because it has been able to improve the game of many basketball players. Just make sure you are purchasing an authentic silent basketball from Quiet Bounce."

Those who have been using the QBounce silent basketball have been leaving highly positive reviews on the website. For instance, Daniel W. gave the QBounce basketball a five star rating and said, "No more noise complaints from my downstairs neighbors when I'm practicing." Kristel B. also gave the product five stars and said, "Great product. Roughly the same size as a size 7 basketball. Not completely silent but very quiet." In another five star review for the QBounce, Cynthia T. said, "My friends were skeptical, but now they all want a quiet basketball." Aliana R. said, "My family loves this quiet basketball. We can play inside without disrupting the house."

Parents have also been happy with the results provided by the QBounce silent basketball. One parent gave the ball a five star rating and said, "I didn't expect the impact this basketball would have on the game of my child. Being able to practice inside the house, even late at night because dribbling the ball didn't produce the typically loud and disruptive sounds, allowed my child to significantly improve their game."

Even basketball coaches were impressed with the QBounce improved the training regimen of his players significantly because they were able to practice anywhere and at anytime. They no longer felt restricted in

practicing because they don't have worry about family members and neighbors complaining about the loud noises the ball would make when dribbling it. The QBounce has the same feel as a regular basketball, which allows the player to train without disturbing other family members and neighbors.

The QBounce is a different kind of basketball because it is made using new foam technology, which is why it doesn't make those loud noises. It is available in three sizes, which are size 7, size 5, and size 3. The size 7 basketball is the standard size used in professional basketball games. The size 7 ball has a circumference of 29.5 inches and it has a standard weight of 22 ounces. The QBounce is also available in size 5, which is the appropriate size for youth leagues for players 8 years old and under. It has a circumference of 27.5 inches and weighs around 17 ounces. The size 5 basketball has a circumference of 27.5 inches and weighs 17 ounces. The QBounce Silent Basketball is also available as a size 3 basketball, which has a circumference of 22.5 inches and a weight of 10 ounces. This is typically called a mini basketball and is suitable for children four years old and under. It can also be used as a commemorative item for any age.

Those who are interested in learning more about the QBounce silent basketball can visit the Quiet Bounce website at <https://quietbounce.com/> where they would be able to place an order for the QBounce. They can also contact them on the telephone or by email. They are open from 10:00 am to 8:00 pm from Monday to Friday.
