

Dr. Mark Hickman Says Reversing a Vasectomy Offers Several Benefits

November 13, 2023

New Braunfels, TX - November 13, 2023 -

Dr. Mark Hickman, MD, FACS, a highly skilled microsurgeon in New Braunfels, TX, wants to emphasize that vasectomy reversals offer several advantages. Dr. Hickman explains that reversing a vasectomy is possible for many patients and this may offer a number of benefits. A typical reason for wanting a vasectomy reversal is a change in the man's marital or relationship status. For men who had a vasectomy and want to father a child again, undergoing fertility treatment is a possibility but a vasectomy reversal will allow the couple to conceive in the natural way, without having to go through the fertility treatment process.

Another important advantage is that vasectomy reversal will be less expensive compared to a fertility treatment, especially since Dr. Hickman is offering two affordable all-inclusive options. The first option is priced at \$3,300 and includes oral sedation and local anesthesia. The second option is priced at \$4,200 and includes IV sedation administered by a board-certified anesthesiologist. Furthermore, since the two microsurgical options are all-inclusive, the patient is assured that there will be no hidden fees.

Another advantage of a vasectomy reversal is that the patient is already familiar with the recovery process, which is the same as the vasectomy procedure. Most men after the vasectomy only experienced mild discomfort or soreness with ice packs and over-the-counter pain-relief medication offering comfort. In addition, the vasectomy reversal is permanent will not need any follow-up procedures after a successful reversal. Furthermore, there will be no added risk during pregnancy,

While ensuring that he will be providing the highest level of care, Dr. Hickman also assures the patient that vasectomy reversal cost will be kept to a minimum. In addition, Dr. Hickman is highly skilled in microsurgery and has chosen to do only vasectomy reversals. During the course of his 26-year career, he has done thousands of successful reversals, which resulted into thousands of births and exultant new parents.

Dr. Hickman is also encouraging not only men in New Braunfels but also in other places in Texas, such as Fort Worth, Dallas, San Antonio, Austin, and Houston, and those from other states, including Oklahoma, Louisiana, and Arkansas, to come to New Braunfels, which is actually a tourist town. Located in New Braunfels is Schlitterbahn, which is the biggest water park in the county and can offer an entire day of fun and entertainment for both adult and kids.

Also found in New Braunfels are two of the most scenic rivers, which are the Guadalupe River and the Comal River, which is also the shortest river in the world. The presence of these two rivers offers a lot of fishing, rafting, swimming, and tubing. Also located in New Braunfels is the unique village of Gruene, which is near the vasectomy reversal clinic. It has over 20 shops where visitors can visit for their pleasure. It also offers great music in the evenings, providing a fun, country dance atmosphere. Furthermore, some 10 miles away on Interstate 35 towards San Marcos can be found two adjacent shopping malls, which are the Prime Outlets and Tanger Outlet Center.

Initiated in 1988, Dr. Mark Hickman's clinic offers his pioneering microsurgical and minimally invasive techniques for vasectomy reversal. He completed his general surgery residency training at the University of Texas Health Science Center at San Antonio and it was during this time that he came to know about the microsurgery approaches that were then being used in cosmetic and reconstructive surgery. He immediately realized the various benefits that minimally invasive microsurgery can offer his patients, so he decided to employ such methods in his vasectomy reversal practice. Dr. Hickman is also inviting patients from other locations in the country visit New Braunfels. He has negotiated with several local hotels to provide his out of town patients to receive a 50 percent decrease in their hotel accommodation bill.

Those who are asking, "Can vasectomy be reversed?" can check out Dr. Hickman's website or contact him on the telephone or through email. The practice is open from 8:30 am to 5:00 pm, from Monday to Friday.
