

## **Toronto Functional Medicine Centre Explains IV Therapy for Cellular Health**

*December 16, 2023*

TORONTO, ON - December 16, 2023 -

Toronto Functional Medicine Centre in Toronto, ON, Canada, has explained through a blog post the use of IV therapy for cellular health that they offer through their IV Therapy Lounge. This is crucial because cellular health has an influence on all aspects of wellness, including immune health, basic daily functioning, and mental clarity to physical exertion, skin health, and muscle recovery. The enhancement of cellular function through key nutrients may help support an individual's health goals and IV therapy may provide some assistance in this.

At their IV Lounge, they explain how essential nutrients can influence cellular health. Providing the proper nutrition to cells is important not just to sustain their current functioning but also to make sure that cellular division is occurring at optimum performance. Furthermore, as people age, the cells age too, thus, maintaining their strength is vital for long-term health.

Cells can be compared to the building bricks that make up a building. Cells have to function at their optimal

best by providing them with key nutrients to ensure optimal functioning, such as cellular mitochondrial regeneration. But in addition to ensuring the cells are provided with vital nutrients, it is also essential to provide them with the proper conditions. This may be done by helping decrease stress and oxidative damage, and provide a full rehydration of fluids.

Cellular improvement can encourage various health benefits, such as: Preventing or delaying the onset of chronic illness symptoms, such as chronic inflammation. Potentially promoting anti-aging effects, benefiting cognitive function, brain health, and skin elasticity. Boosting the immune system, aiding in recuperation from fatigue and potentially enhancing metabolism. Improving muscle function and facilitating recovery from physical activity-related injuries.

Taking care of cellular health may help reduce free radical damage and optimize the detoxification processes. Health improvements begin at the cellular level, which can support cognitive function, energy levels, the appearance of skin, liver repair, red and white blood cell formation, functioning of nerves, and more.

At the Toronto Functional Medicine Centre, complementary therapy may also be included for the personalized treatment plans. They may also include functional medicine therapies that may help improve cellular health, such as intravenous (IV) drips. It is important to note that oral supplementation may be used but the powders, capsules, and tablets will have to be digested first before the nutrients can be absorbed by the cells. A percentage of the nutrients may be lost during digestion because of the filtering effect of the digestive tract. This may hinder or delay the improvement of cellular functioning and the recovery process.

Meanwhile, the IV drips may offer a practical solution for the improvement of cellular health because the digestive tract is bypassed and the nutrients are fully absorbed. The IV drip optimizes the absorption rate because an IV tube is inserted directly into the veins, which enables the nutritional drip formula to go directly to the bloodstream. Furthermore, for people who have malabsorption issues or don't like taking pills, IV therapy may be a viable option to avoid any undesirable side effects, such as nausea, which can be a side effect of taking oral supplements.

The Toronto Functional Medicine Centre in Toronto, Ontario, Canada utilizes an integrative functional medicine strategy that combines allopathic medicine, naturopathic medicine, acupuncture, bio-identical hormone replacement, IV therapy, detoxification, and more. This approach may be employed for different types of health issues, including: neuropathic pain, postmenopausal health issues, acute health issues, tissue repair, athletic recovery, hormone imbalances, DNA repair, fertility issues, cellular damage, chronic fatigue, mineral deficiencies, thyroid issues, adrenal function, skin rejuvenation, immune function, and more.

Those who would like to know more about the integrative functional medicine approach, including the benefits of IV therapy with high dose vitamin C, can visit the Toronto Functional Medicine Centre website or contact

them through the phone at (416) 968-6961, or by email at [info@tfm.care](mailto:info@tfm.care). They are open from 9:00 am to 6:00 pm on Mondays and Wednesdays; from 10:00 am to 5:00 pm on Tuesday and Thursdays; from 9:00 am to 5:00 pm on Fridays; and from 9:00 am to 4:00 pm on alternating Saturdays.
