Backyard Bug Patrol Thanks Customers for Successful Tick and Mosquito Season

November 27, 2023

Great Falls, Virginia - November 27, 2023 -
Backyard Bug Patrol, a pest control services company based in Great Falls, VA, would like to express gratitude to its customers for a successful tick and mosquito season, as well as remind them that discount specials are available for customers who opt for early renewals that are currently available. The payment for this will only be due by January 2024 and customers can opt to sign up in January and February to benefit from the early sign-up discounts. In addition, the company would like to reassure both its residential and commercial customers who have already signed up for indoor pest plans that they will continue to get their scheduled treatments during the fall and winter seasons. More about the company?s services can be gleaned from https://backyardbugpatrolva.business.site/.

Backyard Bug Patrol offers the Tick and Mosquito Barrier Spray Programs where their licensed applicators visit the client?s yard in Northern Virginia and Suburban Maryland. They use backyard sprayers to get rid of ticks and mosquitoes to protect the family and pets from diseases carried by these pests. These sprays penetrate deep into the foliage in the yard and coat the bushes and leaves to provide a protective barrier that repels mosquitoes and ticks.

In addition, the company offers various kinds of barrier spray programs. Their Flower Power Program employs a synthetic derivative of the Chrysanthemum flower to kill and repel ticks and mosquitoes for up to three weeks at a time. Licensed technicians visit the client?s home and treat the yard on a schedule, so there?s no need for the homeowner or property owner to set up an appointment.

Moreover, their Flower Power spray is practically odorless and can cure the foliage, usually within 30 minutes of application. The formula that is sprayed into the foliage is actually a milder concentration of the active ingredient of shampoo used for treating lice in children?s hair and the active ingredient in shampoos for pets and applied on mosquito nets in Africa and other places.

Backyard Bug Patrol also offers a 100 percent Simply Organic Program Package that uses an entirely natural ingredient that is certified by the National Organic Program (NOP) of the USDA. NOP ensures that agricultural products that are being marketed as organic are consistent and uniform. The active ingredient used in their Simply Organic Program is cedar oil or rosemary oil.

Just like the Flower Power Program, their organic spray can kill mosquitoes and ticks on contact and will install an invisible barrier that will last for up to two weeks. They emphasize that this will kill the pests - not just repel them. This organic spray doesn?t contain any preservatives and therefore has a shorter ?shelf life,? which means it has to be sprayed every two weeks during the season. Their licensed technicians show up every two weeks, so there?s no hassle of setting up an appointment.

Started in 2010, Backyard Bug Patrol is committed to offering the best possible customer service for pest control services. Virginia and Maryland residents who would like to get rid of pests can visit the Backyard Bug Patrol website or contact them on the phone or by email. They are open from 9:00 am to 5:00 pm, from Monday to Friday.

More information about the company, such as their office location, and the reviews they have received from past and present customers, can visit their Google Maps page at https://goo.gl/maps/6zRWtU89Ri82.
