

St Ives Smiles Updates Website to Highlight Invisalign Services

November 16, 2023

November 16, 2023 - PRESSADVANTAGE -

St. Ives, NSW ? St Ives Smiles, a contemporary dental practice in St. Ives, proudly announces the enhancement of its website, now prominently featuring Invisalign services. This update underscores the practice's dedication to providing comprehensive dental care and ensuring easy access to information for all patients.

Since its establishment, St Ives Smiles Dental Practice has been at the forefront of modern dental solutions, with clear aligners being a cornerstone of their orthodontic treatments. Invisalign, renowned for its near-invisible aligners and effectiveness in teeth straightening, has been a popular choice among the clinic's patients who prefer a less noticeable alternative to traditional braces.

Dr. Jeremy Hockey, the principal dentist at St Ives Smiles, shared his insights on the update: "Our commitment to offering clear aligners has been a key aspect of our practice since the very beginning. We realised the importance of making this information more accessible on our website. It's essential that our

patients are well-informed and can easily learn about the treatments we offer, including Invisalign.?

The revamped website section dedicated to Invisalign offers comprehensive details about the treatment process, benefits, and patient suitability. St Ives Smiles believes in empowering patients through education, allowing them to make well-informed decisions about their dental care. The updated section not only details Invisalign's features but also elaborates on the personalised approach taken by our dental team to ensure every patient's treatment plan is optimally tailored to their needs.

Invisalign aligners, appreciated for their aesthetic and practical benefits, are tailor-made for each patient. They provide the convenience of being removable, which significantly enhances comfort during eating and cleaning. The updated website now showcases these advantages through FAQs, and details the entire journey, illustrating the effectiveness of Invisalign aligners.

Miss Theresa Tran-Nguyen, co-owner and dental hygienist at St Ives Smiles, emphasised the importance of this enhancement: "Invisalign has been a preferred orthodontic solution among our patients for its discreet nature and convenience. By updating our website, we aim to provide a clear and comprehensive understanding of what patients can expect from Invisalign treatment."

The website is designed to be user-friendly, ensuring that information about Invisalign and other dental services is easily accessible. In addition, the site includes a blog section where the clinic shares valuable insights and tips on various dental health topics. With this enhanced online presence, St Ives Smiles continues to demonstrate its commitment to embracing modern technology not only in dental treatments but also in patient communication and education.

This website enhancement is a testament to St Ives Smiles' commitment to improving patient experience and engagement. Featuring Invisalign more prominently not only highlights this important service but also reaffirms the clinic's role as a leading, patient-focused dental practice in St. Ives offering Invisalign services. It reflects the clinic's proactive approach in responding to patient needs and staying ahead in the ever-evolving field of dental health care.

Dr. Hockey invites patients to visit the updated website: "We encourage everyone to explore our new Invisalign section on the website. Our team is dedicated to providing exceptional dental care, and we are here to support you through every stage of your dental health journey."

For more information about St Ives Smiles and their Invisalign services, or to schedule a consultation, please visit the newly updated website.
