

IMHO Reviews Skillshare's 50% Off Black Friday and Cyber Monday Offer

November 17, 2023

AVENTURA, FL - November 17, 2023 - PRESSADVANTAGE -

In an exciting development for learners everywhere, IMHO Reviews has shared Skillshare's Black Friday/Cyber Monday offer: a limited-time 50% discount on monthly or annual subscriptions, valid from November 13th to 30th, midnight EST. Vitaliy Lano, CEO of IMHO Reviews, seizes this moment to discuss the burgeoning trends of lifelong learning, microlearning, and the cultivation of soft skills, which are becoming increasingly essential in today's evolving educational and professional landscapes.

Lano highlights lifelong learning as a key educational trend for 2024, stressing its significance in the ever-changing job market. He notes that in an era marked by rapid technological advancements, continuous skill development is not just an option but a necessity. Skillshare, with its versatile learning platform, emerges as a perfect match for this trend, enabling learners to adapt and grow in a dynamic world.

Lano points out that soft skills such as entrepreneurship, public speaking, and leadership are in high demand. Skillshare's courses are designed to address these needs, helping individuals enhance their critical thinking,

problem-solving, and people management abilities. He also acknowledges the challenges faced by educators in balancing online learning with the need for face-to-face interaction to develop these soft skills effectively.

Addressing the issue of decreasing attention spans, Lano references a study by Andrews University, which found a significant decline in attention spans since the dawn of the mobile revolution. This phenomenon has given rise to the popularity of microlearning, a method that Skillshare adeptly employs. By breaking down complex topics into bite-sized, digestible segments, Skillshare caters to the learning styles of Millennials and Gen Z, who respond best to engaging, visually-rich content.

Lano emphasizes that the 4th Industrial Revolution is reshaping the nature of work, making lifelong learning an essential pursuit for professionals. He advocates for educational institutions to instill a self-development mindset, preparing students not just for their initial careers but for a lifetime of learning. Skillshare's platform, with its vast array of courses, aligns perfectly with this need, offering continuous learning opportunities that are crucial for success in a technologically driven world.

Vitaliy also discusses Skillshare's Learning Paths, a unique method that focuses on sequential, focused learning. These paths offer hand-picked, curated classes that build upon each other, enabling learners to deepen their skills effectively. Available for various experience levels, Learning Paths are designed to guide users through a comprehensive learning journey, from beginner to advanced stages.

When asked about the significance of certification, Vitaliy explains that Skillshare offers class certificates upon completion of all lessons in a class and submission of a related project. These certificates, while not accredited, bear the member's name, class title, issue date, teacher, class length, and a unique ID, validating the learner's achievement. To share these certificates, users can sign into their Skillshare account, navigate to their profile, click on 'Achievements', choose the desired certificate, and share it on various platforms or via a link.

Lano brings attention to Skillshare's latest beta feature: 1-on-1 Sessions. This personalized learning experience connects members with industry leaders for private, tailor-made classes via 30, 45, or 60-minute video chats. These sessions offer not just personalized instruction but also portfolio feedback and professional development advice, catering to the specific needs and goals of each learner.

In conclusion, Vitaliy Lano and IMHO Reviews highly recommend taking advantage of Skillshare's extended Black Friday and Cyber Monday offer. The discount opens doors to a world of learning and development, perfectly aligning with the educational trends of 2024 and beyond.
