

Go Industries Inc Now Offers Top Quality Mud Flaps for Dually Trucks

November 22, 2023

Richardson, TX - November 22, 2023 -
Go Industries Inc, a company based in Richardson, TX, that manufactures truck accessories, is happy to announce they are now offering the best quality mud flaps for dually trucks. These dually truck mud flaps are designed to protect the truck?s paint and also other drivers from spraying mud, rocks, debris, salt, sand, and more. These mud flaps are available for all dually trucks including Dodge, Ford, Chevrolet, and CMC from Go Industries. At best, they will leave the truck a dirty mess that requires washing and at worst, the rocks, debris, mud, and other things that are kicked up from the wheels can impact the truck?s paint.

A dually or a dual rear-wheel truck (DRW) is a heavy duty pickup truck with two rear wheels on each side. This offers the benefit of a larger contact with the road to provide better traction, balance, and stability. Dually wide body trucks have huge rear fenders to house the dual rear wheels. These big dual wheels require mud flaps, which are durable, tough, and able to withstand the impact of mud, stones, debris, and more.

A spokesperson for Go Industries says, ?That?s where Go Industries comes in. Since 1978 Go Industries

has been on the pulse of the truck accessories market providing long-lasting, durable and handsome add-ons for truck owners. Our mud flaps are no exception. With quality second to none, the Go Industries Truck Mud Flaps are built tough and built to last. Go Industries mud flaps options include stainless steel accents, diamond treads, mounting brackets, and anti-sail brackets.?

The tires of the truck are always in contact with all types of potentially paint-damaging items such as mud, small rocks, tar, and various kinds of debris. The fender wells have been designed to deflect these things but they are not able to prevent everything from reaching the paint of the truck. This is because the fender wells do not reach down to the tires, thus leaving a big area that is unprotected, allowing the tires to flip mud, stones, debris, and other things with strong impact on the paint of the truck and also the vehicles that are behind. This is particularly dangerous when the dually truck passes an area where there are a lot of small rocks, such as a construction site. The small rocks can hit the paint with such a strong force that they may cause dings and dents to the truck and other vehicles that happen to be behind the truck. Installing the proper size of mud flaps can help save money and time by protecting the truck from small rocks, mud, and other things that may damage the paint, requiring a costly paint job.

Go Industries Mud Flap kits are vital for any truck on the road. Mud flaps are required by most states and their mud flaps are capable of deflecting mud, debris, and stones from the rear tires to protect the truck as well as those vehicles that are behind. These mud flaps have been fabricated using non-recycled rubber. They measure 19 inches by 24 inches for all dual wheel trucks and 12 inches by 24 inches for single wheel. Stainless and diamond tread accessories are also available for all mud flaps.

Founded in 1978 by Mr. R.J. Orth, Go Industries Inc is based in Richardson, TX, and offers accessories for trucks in the US that are manufactured using state of the art facilities equipped with computer controlled manufacturing equipment and robotic welding machines. Some of the accessories they offer are: Big Tex Grille Guards, Rancher Grille Guard, Pro Series - Winch Bumper Replacement, Winch System Grille Guards, law enforcement vehicle accessories, racks, mud flaps, steps, and custom manufacturing products. Go Industries also offer various kinds of custom manufacturing services for making vehicle accessories. They offer tube services, sheet metal services and other services.

Those who are looking for dually mud flaps can check out the Go Industries Inc website or contact them on the phone.
