

Go Industries Inc. Is Offering High Quality Mud Flaps For Dually Trucks

December 06, 2023

Richardson, TX - December 06, 2023 -
Go Industries Inc., a manufacturer of fleet, truck, and law enforcement accessories since 1978, is urging customers to check out its offerings of mud flaps for dually trucks.

A ?dually? or dual rear-wheel truck (DRW) is a heavy-duty pickup truck that has dual, or two rear wheels on each side. This allows for greater contact with the road resulting in better traction, stability, and balance. Dually wide-body trucks have large brawny rear fenders to house the dual rear wheels. These tough trucks can haul heavy loads and tow boats, trailers, and campers. With these large dual wheels in the rear comes the need for mud flaps.

?No dually trucks should be without mud flaps to protect against paint damage and flying debris kicked up by the four rear tires of the truck,? says the spokesperson for Go Industries Inc. ?Moreover, the mud flaps should be tough, durable, and worthy to bear the wear and tear that they will undoubtedly encounter in the field. That?s where Go Industries Inc. comes in. Since 1978, we have been on the pulse of the truck

accessories market providing long-lasting, durable, and handsome add-ons for truck owners. Our mud flaps are no exception. With quality second to none, the Go Industries Truck Mud Flaps are built tough and built to last.?

Mud flaps protect a truck by deflecting debris away from the fender wells. While a truck?s fender wells are designed to contain paint-damaging things like mud, tar, and small rocks, they can?t do it all. Fender wells do not reach down to the tires and leave a substantial area unprotected allowing tires to flip mud, rocks, salt, and more out violently toward the paint as well as other drivers behind the truck. Installing the right mud flaps can, then, help save money and time by keeping the truck cleaner and better protected from anything that can get swept up in the tire treads.

?Mudflap kits are essential for any truck on the road,? says the spokesperson. ?Mandatory by most states, our flaps deflect debris from the rear tires ensuring that your truck stays protected as well as vehicles that are behind you. Made out of non-recycled rubber, the flaps measure 19? x 24? for all dual-wheel trucks and 12? x 24? for single-wheel. Stainless and Diamond Tread accessories are available for all flaps.?

To get started on the Go Industries Inc. online store, customers can select the year their truck or law enforcement vehicle is from, choose the make of the car including Chevrolet, Dodge, Ford, and GMC, and choose the model including 2500/3500, 2500HD/3500, Ram, or Super Duty. Finally, they can choose the ideal mud flap kit for their needs including the Classic Dually Set, Stainless Steel Dually Set, Diamond Tread Dually Set, Dually Flaps & Bracket Only, and Dually Mounting Brackets only.

Founded in 1978 by Mr. R.J. Orth, Go Industries Inc. is today a manufacturing powerhouse for truck accessories, law enforcement vehicle accessories, and a range of custom manufacturing jobs. After moving into a new distribution facility in Richardson, TX, in 1984, in the ensuing decades, the company bought several competitors and partner companies to expand and thrive in a tough industry.

?For us, it has always been about quality,? says the spokesperson. ?Our products today are manufactured in state-of-the-art facilities utilizing computer-controlled manufacturing equipment and robotic welding machines. Moreover, all products are backed by a Go Industries warranty. With all parts proudly made in the USA, we urge you to check out our line of front-end truck accessories including Rancher Grille Guard, BigTex Grille Guard, Winch Application System, Medium Duty Grille Guards, and Bumper Replacement, back-end truck accessories including Air Flow Tailgates, Flat Iron Headache Racks, and Heavy Duty Headache Rack, mud flaps, steps, and law enforcement accessories for Chevrolet, Ford, and Dodge.?
